YSEC Yearbook of Socio-Economic Constitutions 2021 Steffen Hindelang, Andreas Moberg, 2022-07-12 This volume addresses contemporary challenges enabled by modern technology that concern upholding freedom of speech where it conflicts with social rights such as respect for private and family life and with economic rights such as the freedom to conduct business or the right to free movement In today s networked world technological shifts happen faster than most people even realize Some of these shifts have made us all potentially powerful media powerful We used to sit in silence in front of newspapers and TV screens and the world was explained to us by just a few sources Today thanks to the Internet social media and Web 2 0 we can not only share our own thoughts with everyone in a more self determined way but we can also take part in public debate and even co shape it ourselves Of course the Internet is not a counter design to the communication power structures of the past Gains in communicative self determination are threatened due to algorithmisation platformisation and value extraction from self created private markets At the same time the empowerment of the individual challenges the old grand speakers who are suddenly detecting fake news echo chambers and filter bubbles everywhere on the Internet Internet based communication allegedly hinders us from the one truth as if newspaper hoaxes propaganda and narrow mindedness were an

invention of the Internet The current heated debate over fake news copyright and upload filters shows that we are unsure of how to deal with the newer and more complex phenomena of Internet based speech This is due in no small part to the fact that an important benchmark our constitutional compass is still firmly rooted in the past Constitutions change far more slowly than technologies Societal changes can drive constitutional changes but what about normative content control Today there are already demands for old school clarity truth filters on social media platforms horrendous sums of liability for platforms that encourage overly thorough cleaning up However it is equally true that private individuals regulate they decide what is found on the Internet and who may post on a given platform Accounting for all interests at play and striking a fair balance that avoids both a public and private over and under regulation is a complex matter The authors of this volume not only provide reflections in their highly topical contributions but also share their understanding of what constitutes a fair balance within the larger frame of freedom of speech in a digital age
