Therapie von Entscheidungskonflikten Bernhard Mitterauer, 2008-08-05 Entscheidungskonflikte betreffen zumeist den zwischenmenschlichen Bereich und sind berwiegend mit negativen Erfahrungen verbunden Sie bedeuten oft Unannehmlichkeiten Stress Leistungsverlust und Zerst rung In diesem Buch wird ein neuer Ansatz vorgestellt wie solche Konflikte therapeutisch zu l sen sind Das zugrundeliegende Volitronics Prinzip beruht auf einem neuen biokybernetischen Hirnmodell und einer neuen Entscheidungslogik Im praktischen Teil des Buches Teil I wird die therapeutische

Vorgangsweise konkret und anhand von Fallbeispielen vorgestellt Für die Analyse der den Entscheidungskonflikten zugrundeliegenden Intentionen wird eine modifizierte Freud'sche Traumanalyse angewandt Die Therapie von Entscheidungskonflikten ist nicht nur für Menschen in Krisen sondern modifiziert auch für Depressionen anwendbar was sich von dem im theoretischen Teil des Buches Teil II dargestellten Hirnmodell ableiten lässt **Gehirn und Geist** Gerald M. Edelman, Giulio Tononi, 2002

Electromagnetic Field Theories of Consciousness: Opportunities and Obstacles Tam Hunt, Jonathan Schooler, John Joe McFadden, Arnaud Delorme, Colin G. Hales, Mostyn Jones, Marissa Ericson, 2024-03-27 This new Research Topic is in part a celebration of the 30th anniversary of the game changing neural correlates of consciousness concept first proposed as part of Crick and Koch's 1990 neurobiological theory of consciousness After thirty years of research and theory building scholars in the science of consciousness are perhaps not much closer to a widely accepted theory of consciousness

Bindungswissen für die systemische Praxis Alexander Trost, 2018-06-11 Bereits 1969 betonte John Bowlby der Begründer der Bindungstheorie dass eine interdisziplinäre Perspektive für die Erforschung von Entwicklungs- und Veränderungsprozessen beim Menschen essenziell ist Diese schloss seinen originär psychoanalytischen Ansatz die empirische Perspektive der Tier-Verhaltensforscher und das systemische Paradigma ein Die Wissensbasis dieser Denk- und Handlungsansätze hielt er für grundlegend für ein weitergehendes Verständnis des Zusammenhangs zwischen einerseits biologischen Grundmustern des Lebens und andererseits der fortlaufenden Modifikation dieser Muster durch die menschliche Kommunikation beginnend mit der ganz frühen Mutter-Kind-Beziehung Fünfzig Jahre neurobiologische Bindungs- und Resilienzforschung haben diese Annahme eindrucksvoll bestätigt Systemtheorie und systemische Praxis entwickelten in ungefähr der gleichen Zeitspanne wirksame Verfahren in der Beratung und Therapie von Einzelnen, Paaren und Familien Die naheliegende Verbindung zwischen Bindungstheorie und Systemtheorie wurde in der Vergangenheit vernachlässigt Mit diesem Buch unternimmt Alexander Trost den Versuch das Fremdsein der Systemiker gegenüber Neurobiologie und Bindungstheorie durch eine interessiert neugierige Annäherung auf eine andere Resonanzstufe zu bringen Die Bedeutung von Kontexten ist in beiden Verfahren grundlegend und beide können von den Erkenntnissen und

Methoden der anderen wesentlich profitieren Die Verbindung von theoretischer Grundlegung und methodisch praktischer Anwendung von Bindungswissen und Mentalisieren in der systemischen Arbeit ist anregend und nutzbringend für alle Interessierten aus psychosozialen Arbeitsfeldern

Bio-Inspired Information Pathways Martin Ziegler, Thomas Mussenbrock, Hermann Kohlstedt, 2023-09-19 This open access book offers a timely and comprehensive review of the field of neurotronics Gathering cutting edge contributions from neuroscientists biologists psychologists as well as physicists microelectronics engineers and information scientists it gives extensive information on fundamental information pathways in selected nervous systems It also highlights their relevance as building blocks for novel computing architectures such as bio inspired electronic devices neuromorphic architectures memristive devices adaptive sensors and emergent pulsed coupled oscillatory networks All in all this book offers a unique bridge between fundamental research in neuroscience neural information processing nonlinear dynamics and self organization and advanced practical applications concerning the fabrication of hardware oriented computing

The Veil of Signs Sheldon Brivic, 1991 How does perception operate in James Joyce's fiction This question is addressed from a unique perspective in The Veil of Signs Sheldon Brivic uses the theories of Jacques Lacan to create a radically new concept of the mechanics of mental life in the novels including Ulysses and Finnegans Wake This is the first book to make use of Lacan's writings and seminars on Joyce

Intentionalität aus semiotischer Sicht Stefan Kappner, 2012-10-24 In the present day philosophy of mind the abilities to reflect and to relate thinking to reality are subsumed under the heading of intentionality After an introduction to the questions and difficulties of the most relevant theories of intentionality Stefan Kappner presents Charles Sanders Peirce's semiotic theory He uses the semiotic concepts developed to gain systematic access to the skills of intentionality by presenting a novel understanding of them as skills of interpreting signs Taking constructive issue with present day attempts at naturalisation in particular with teleosemantics Kappner constructs a theory of intentionality points up its biological roots without reducing it to these

The Neurophysics of Human Behavior Mark E. Furman, Fred P. Gallo, 2000-06-22 How do brain mind matter and energy interact Can we create a comprehensive model of the mind and brain their interactions and their influences Synthesizing research from neuroscience physics biology systems science information science psychology and the cognitive sciences The Neurophysics of Human Behavior advances a unified theory of

The Computational Beauty of Nature Gary William Flake, 2000-01-27 Gary William Flake develops in depth the simple idea that recurrent rules can produce rich and complicated behaviors In this book Gary William Flake develops in depth the simple idea that recurrent rules can produce rich and complicated behaviors Distinguishing agents e.g. molecules cells animals and species from their interactions e.g. chemical reactions immune system responses sexual reproduction and evolution Flake argues that it is the computational properties of interactions that account for much of what we think of as beautiful and interesting From this basic thesis Flake explores what he considers to be today's four most interesting computational topics fractals chaos complex systems and

adaptation Each of the book's parts can be read independently enabling even the casual reader to understand and work with the basic equations and programs Yet the parts are bound together by the theme of the computer as a laboratory and a metaphor for understanding the universe The inspired reader will experiment further with the ideas presented to create fractal landscapes chaotic systems artificial life forms genetic algorithms and artificial neural networks Gaps in Nature Ellen Spolsky,1993-07-01 This book is a study of the relation between cognitive linguistics and literary theory Theory of literary interpretation is reinterpreted in terms of current debate in cognitive science While research in the humanities and social sciences is reasonably concerned with charting the power of culture to structure and constrain Spolsky suggests that it is worthwhile to investigate the role of biological materialism as co legislator of human life and understanding The inevitable slippage we have come to acknowledge between words and the world has at least an analogue and presumably also a source in the workings of the human brain

The Philosophy of Science: A-M Sahotra Sarkar,Jessica Pfeifer,2006 The first in depth reference to the field that combines scientific knowledge with philosophical inquiry this encyclopedia brings together a team of leading scholars to provide nearly 150 entries on the essential concepts in the philosophy of science The areas covered include biology chemistry epistemology and metaphysics physics psychology and mind the social sciences and key figures in the combined studies of science and philosophy Midwest

A Critical Overview of Biological Functions Justin Garson,2016-03-30 This book is a critical survey of and guidebook to the literature on biological functions It ties in with current debates and developments and at the same time it looks back on the state of discourse in naturalized teleology prior to the 1970s It also presents three significant new proposals First it describes the generalized selected effects theory which is one version of the selected effects theory maintaining that the function of a trait consists in the activity that led to its differential persistence or reproduction in a population and not merely its differential reproduction Secondly it advances within discipline pluralism as opposed to between discipline pluralism a new form of function pluralism which emphasizes the coexistence of function concepts within diverse biological sub disciplines Lastly it provides a critical assessment of recent alternatives to the selected effects theory of function namely the weak etiological theory and the systems theoretic theory The book argues that to the extent that functions purport to offer causal explanations for the existence of a trait there are no viable alternatives to the selected effects view The debate about biological functions is still as relevant and important to biology and philosophy as it ever was Recent controversies surrounding the ENCODE Project Consortium in genetics the nature of psychiatric classification and the value of ecological restoration all point to the continuing relevance to biology of philosophical discussion about the nature of functions In philosophy ongoing debates about the nature of biological information intentionality health and disease mechanism and even biological trait classification are closely related to debates about biological functions

Biophysics Of Consciousness: A Foundational Approach Roman R Poznanski,Jack A Tuszynski,Todd E Feinberg,2016-08-25 The problem of how the brain produces consciousness subjectivity and something it is

like to be remains one of the greatest challenges to a complete science of the natural world While various scientists and philosophers approach the problem from their own unique perspectives and in the terms of their own respective fields Biophysics of Consciousness A Foundational Approach attempts a consilience across disparate disciplines to explain how it is possible that an objective brain produces subjective experience This volume unites the cr me de la cr me of physicists neuroscientists and psychiatrists in the attempt to understand consciousness through a foundational approach encompassing ontological evolutionary neurobiological and Freudian interpretations with the focus on conscious phenomena occurring in the brain By integrating the perspectives of these diverse disciplines with the latest research and theories on the biophysics of the brain the book tries to explain how consciousness can be an adaptive and causal element in the natural world
