Smart Home Systems Mahmoud Al-Qutayri,2010-02-01 Smart homes are intelligent environments that interact dynamically and respond readily in an adaptive manner to the needs of the occupants and changes in the ambient conditions The realization of systems that support the smart homes concept requires integration of technologies from different fields Among the challenges that the designers face is to make all the components of the system interact in a seamless reliable and secure manner Another major challenge is to design the smart home in a way that takes into account the way humans live and interact This later aspect requires input from the humanities and social sciences fields The need for input from diverse fields of knowledge reflects the multidisciplinary nature of the research and development effort required to realize smart homes that are acceptable to the general public The applications that can be supported by a smart home are very wide and their degree of sophistication depends on the underlying technology used Some of the application areas include monitoring and control of appliances security telemedicine entertainment location based services care for children and the elderly etc This book consists of eleven chapters that cover various aspects of smart home systems

What Matters for Health and Happiness Among the Older Adults in Asia Nai Peng Tey, Halimah Awang, Shekhar Chauhan,2024-03-11 People want to live a healthy and happy later life A large body of literature shows the close association between health status and happiness and between health and active engagement in work exercise and social and religious activities However the causation between the two can run both ways and it is difficult to determine the causal effect with cross sectional data Various authors have shown the significant influence of socioeconomic factors and human needs on older people s health status and happiness A better understanding of the factors affecting healthy and happy aging is essential for policymaking to improve the well being of older people The availability of data from HRS family studies in several Asian countries CHARLS in China LASI in India JSTAR in Japan KLoSA in Korea IFLS in Indonesia HART in Thailand MARS in Malaysia and Longitudinal Study of Ageing and Health in Viet Nam see Gateway to Global Aging Data provides an excellent opportunity for researchers to examine factors affecting health and happiness among older adults within and across Asian countries This research topic aims to gather papers that investigate the socioeconomic attitudinal and behavioural factors affecting the health status and happiness life satisfaction of older adults in Asia The dependent variables may include physical health mental health disability ADL IADL cognitive functioning self rated health health expenditure feeling of happiness and life satisfaction The independent variables may be age gender marital status place of residence educational level active engagement work exercise social and religious activities family and social relationship and support outlook in life smoking drinking and access to and utilization of healthcare services etc Manuscripts can be based on individual countries or

cross country analysis preferably using the panel data to establish the causal effects of the independent variables on the dependent variables
