The book discusses how to relate historical innovations and disruptions in financial services to the current landscape, how to follow a process to identify the threats facing incumbent processes and businesses, and how innovative thinking can be used as a disruptive weapon to attack incumbents and create effective new fintech models. How many fintech innovations will be constructed by re-arranging or re-purposing existing core processes? In this insightful book, author James Deitch, CPA, CMB, argues that some of today's high-flying fintech innovators will flourish but many may perish as the fire of innovation consumes those fintechs that are slow to monetize their promises.
