social inequality pertains to prejudice and discrimination against people based on their physical appearance. This form of inequality overlaps with other better known forms of inequality such as those that result from sexism, racism, ageism, and classism. Social inequality regarding looks is notable in a number of settings: work, medical treatment, romance, and marriage, to mention a few. It is experienced as limitations on access to social power. Berry discusses the pressures to be attractive and the methods by which we strive to alter our appearance through plastic surgery, cosmetics, and the like. Berry also discusses cultural factors such as the manner in which globalization of media advertisements and movies have trended toward homogenization whereby we are all encouraged to appear tall, thin, white, and with Northern European features, even if we are none of those things. She also analyzes the underlying social forces such as economic incentives that on the one hand channel us to be as physically acceptable as possible via the sale of diet pills and skin lighteners, and on the other hand encourage us to accept ourselves as we are by selling us plus size clothing. The book concludes with suggestions for equal rights extended to all regardless of appearance. Here Berry describes budding social movements and grassroots endeavors toward an acceptance of looks diversity. *Talking Book Topics*, 1987. Includes audio versions and annual title/author index.
