cybersecurity with an AI powered toolkit

Book Description Are you ready to unleash the potential of AI driven cybersecurity? This cookbook takes you on a journey toward enhancing your cybersecurity skills whether you're a novice or a seasoned professional. By leveraging cutting edge generative AI and large language models such as ChatGPT you'll gain a competitive advantage in the ever evolving cybersecurity landscape. ChatGPT for Cybersecurity Cookbook shows you how to automate and optimize various cybersecurity tasks including penetration testing vulnerability assessments risk assessment and threat detection. Each recipe demonstrates step by step how to utilize ChatGPT and the OpenAI API to generate complex commands write code and even create complete tools. You'll discover how AI powered cybersecurity can revolutionize your approach to security providing you with new strategies and techniques for tackling challenges. As you progress you'll dive into detailed recipes covering attack vector automation vulnerability scanning GPT assisted code analysis and more. By learning to harness the power of generative AI you'll not only expand your skillset but also increase your efficiency. By the end of this cybersecurity book you'll have the confidence and knowledge you need to stay ahead of the curve mastering the latest generative AI tools and techniques in cybersecurity.

What you will learn

- Master ChatGPT prompt engineering for complex cybersecurity tasks
- Use the OpenAI API to enhance and automate penetration testing
- Implement artificial intelligence driven vulnerability assessments and risk analyses
- Automate threat detection with the OpenAI API
- Develop custom AI enhanced cybersecurity tools and scripts
- Perform AI powered cybersecurity training and exercises
- Optimize cybersecurity workflows using generative AI powered techniques

Who this book is for This book is for cybersecurity professionals IT experts and enthusiasts looking to harness the power of ChatGPT and the OpenAI API in their cybersecurity operations. Whether you're a red teamer blue teamer or security researcher this book will help you revolutionize your approach to cybersecurity with generative AI powered techniques.

A basic understanding of cybersecurity concepts along with familiarity in Python programming is expected. Experience with command line tools and basic knowledge of networking concepts and web technologies is also required.

Key Features

- Understand how to use PyTorch to build advanced neural network models
- Get the best from PyTorch by working with Hugging Face fastai PyTorch Lightning PyTorch Geometric Flask and Docker
- Unlock faster training with multiple GPUs and optimize model deployment using efficient inference frameworks

Book Description PyTorch is making it easier than ever before for anyone to build deep learning applications. This PyTorch deep learning book will help you uncover expert techniques to get the most out of your data and build complex neural network models. You'll build convolutional neural networks for image classification and recurrent neural networks and transformers for sentiment analysis. As you advance you'll apply deep learning across different domains such as music text and image.

generation using generative models including diffusion models You'll not only build and train your own deep reinforcement learning models in PyTorch but also learn to optimize model training using multiple CPUs GPUs and mixed precision training You'll deploy PyTorch models to production including mobile devices Finally you'll discover the PyTorch ecosystem and its rich set of libraries These libraries will add another set of tools to your deep learning toolbox teaching you how to use fastai to prototype models and PyTorch Lightning to train models You'll discover libraries for AutoML and explainable AI XAI create recommendation systems and build language and vision transformers with Hugging Face By the end of this book you'll be able to perform complex deep learning tasks using PyTorch to build smart artificial intelligence models What you will learn Implement text vision and music generation models using PyTorch Build a deep Q network DQN model in PyTorch Deploy PyTorch models on mobile devices Android and iOS Become well versed in rapid prototyping using PyTorch with fastai Perform neural architecture search effectively using AutoML Easily interpret machine learning models using Captum Design ResNets LSTMs and graph neural networks GNNs Create language and vision transformer models using Hugging Face Who this book is for This deep learning with PyTorch book is for data scientists machine learning engineers machine learning researchers and deep learning practitioners looking to implement advanced deep learning models using PyTorch This book is ideal for those looking to switch from TensorFlow to PyTorch Working knowledge of deep learning with Python is required
