The New Empire of AI Rachel Adams, 2024-11-05 As AI takes hold across the planet and wealthy nations seek to position themselves as global leaders of this new technology the gap is widening between those who benefit from it and those who are subjugated by it As Rachel Adams shows in this hard hitting book growing inequality is the single biggest threat to the transformative potential of AI Not only is AI built on an unequal global system of power it stands poised to entrench existing inequities further consolidating a new age of empire AI's impact on inequality will not be experienced in poorer countries only it will be felt everywhere The effects will be seen in an intensification of international migration as opportunities increasingly concentrate in the hands of wealthier nations in heightened political instability and populist politics and in climate related disasters caused by an industry that is blind to its environmental impact across supply chains We need to act now to address these issues Only if the current inequitable trajectory of AI is halted the incentives changed and the production and use of AI decentralized and decoupled from wealthier nations will AI be able to deliver on its promise to build a better world for all Also available as an audiobook
