

Nelson Advanced Functions 12 – Study Sheet

Absolute Maximum / Minimum (p. 131)

These are the highest and lowest values a function reaches over its entire domain.

- Absolute Maximum: The greatest y-value on the graph.

- Absolute Minimum: The smallest y-value on the graph.

Example: $f(x) = -x^2 + 4$ — Vertex at (0, 4); Absolute maximum = 4; No absolute minimum.

Absolute Value (p. 73)

The distance a number is from 0 on the number line. Always non-negative.

Definition:

$|x| = x$ if $x \geq 0$; $|x| = -x$ if $x < 0$

Example: $|5| = 5$, $|-3| = 3$

Absolute Value Functions (pp. 14–17, 25, 53)

Functions involving absolute value expressions. Basic form: $f(x) = |x|$ (V-shaped graph)

Example: $f(x) = |x - 2| + 1$ — Vertex at (2, 1), opens upward.

Asymptotes (pp. 20, 25)

Lines that a graph approaches but never touches.

- Vertical: often from division by zero.

- Horizontal/oblique: describe end behaviour.

Example: $f(x) = 1/x$ — Vertical: $x = 0$; Horizontal: $y = 0$

Characteristics of Functions (p. 26)

Features include domain, range, intercepts, symmetry, increasing/decreasing intervals, and discontinuities.

Example: $f(x) = x^2$ — Domain: all reals; Range: $y \geq 0$; Symmetry: even

Discontinuity (p. 25)

Points where the graph jumps, breaks, or has holes.

Example: $f(x) = (x^2 - 1)/(x - 1)$ simplifies to $x + 1$, but has a hole at $x = 1$ (removable discontinuity).

Domain (pp. 15, 19, 25, 27, 30)

All possible input (x) values for which the function is defined.

Examples:

- $f(x) = \sqrt{x - 3}$ — Domain: $x \geq 3$

- $f(x) = 1/x$ — Domain: $x \neq 0$

Treagust, Reinders Duit, Hans E. Fischer, 2017-07-24 This volume is important because despite various external representations such as analogies metaphors and visualizations being commonly used by physics teachers educators and researchers the notion of using the pedagogical functions of multiple representations to support teaching and learning is still a gap in physics education The research presented in the three sections of the book is introduced by descriptions of various psychological theories that are applied in different ways for designing physics teaching and learning in classroom settings The following chapters of the book illustrate teaching and learning with respect to applying specific physics multiple representations in different levels of the education system and in different physics topics using analogies and models different modes and in reasoning and representational competence When multiple representations are used in physics for teaching the expectation is that they should be successful To ensure this is the case the implementation of representations should consider design principles for using multiple representations Investigations regarding their effect on classroom communication as well as on the learning results in all levels of schooling and for different topics of physics are reported The book is intended for physics educators and their students at universities and for physics teachers in schools to apply multiple representations in physics in a productive way *Biology/science Materials* Carolina Biological Supply Company, 1991

students Given the complexities that the ethnographic data displayed the author found that conventional notions of writing as a process of transcription and of disciplines as unified discourse communities were inadequate As such this book also offers an in depth exploration of sociohistoric theory in relation to writing and disciplinary enculturation Specific case studies introduce apply and further elaborate notions of writing as literate activity authorship as mediated by other people and artifacts classroom tasks as speech genres enculturation as the interplay of authoritative and internally persuasive discourses and disciplinarity as a deeply heterogeneous laminated and dialogic process This blend of research and theory should be of interest to scholars and students in such fields as writing studies rhetoric writing across the curriculum applied linguistics English for academic purposes science and technology studies higher education and the ethnography of communication
