Evans, 2010-11-25 The study of neurofeedback and neuromodulation offer a window into brain physiology and function suggesting innovative approaches to the improvement of attention anxiety pain mood and behavior Resources for understanding what neurofeedback and neuromodulation are how they are used and to what disorders and patients they can be applied are scarce and this volume serves as an ideal tool for clinical researchers and practicing clinicians in both neuroscience and psychology to understand techniques analysis and their applications to specific patient populations and disorders The top scholars in the field have been enlisted and contributions offer both the breadth needed for an introductory scholar and the depth desired by a clinical professional Includes the practical application of techniques to use with patients Includes integration of neurofeedback with neuromodulation techniques Discusses what the technique is for which disorders it is effective and the evidence basis behind its use Written at an appropriate level for clinicians and researchers

Neurofeedback Ute Strehl, 2020-06-09 There is increasing demand for neurofeedback as part of treatment for disorders with known neurobiological correlates and thus for some psychiatric and neurological clinical pictures as well including ADHD autism migraine epilepsy This volume provides sound theoretical and technical foundations on neurofeedback and fields of application for it It describes both the scientific evidence and practical procedures related to individual clinical pictures This second edition has been completely revised and expanded with chapters on psychopathy and post traumatic stress disorder

Cantor, James R. Evans, 2013-10-18 Neurotherapy sometimes called EEG biofeedback and or neurobiofeedback involves techniques designed to manipulate brain waves through non invasive means and are used as treatment for a variety of psychological and medical disorders The disorders covered include ADHD mood regulation addiction pain sleep disorders and traumatic brain injury This book introduces specific techniques related equipment and necessary training for the clinical practitioner Sections focus on treatment for specific disorders and which individual techniques can be used to treat the same disorder and examples of application and the evidence base for use are described An introduction for clinical practitioners and psychologists investigating neurotherapy techniques and application Includes coverage of common disorders such as ADHD mood regulation addiction pain sleep disorders and traumatic brain injury Includes evidence base for use Includes training methods for new users Clinical Neurotherapy Dagmar Timmers, 2013-10-18 Neuromodulation or more specifically neurofeedback as a treatment for ADHD attention deficit hyperactivity disorder has long been practiced and recent advances in research and equipment have provided information on how these neuromodulation techniques might work Recent studies show promising effects of neuromodulation as a treatment for ADHD but there are many differences between the methods used Because EEG neurofeedback yields the best documented results commonly used EEG protocols such as theta beta training SMR and slow cortical potential training are described and reviewed qEEG and phenotype based protocols are compared to more general assumptions about neuromodulation and ADHD The protocols are also compared and combined into a neuropsychological model of attention leading to an understanding of how different protocols can lead to similar results in the treatment of ADHD Furthermore neuropsychology is discussed with regard to how it may help with understanding how behavior is changed by neuromodulation Finally behavior and learning are discussed in relation to neuromodulation **Es muss nicht immer ADHS sein** Petra Friederichs, Edgar Friederichs, 2021-03-13 Neue und effiziente Therapiemöglichkeiten bei Lernproblemen Aufmerksamkeitsstörungen Hausaufgabenchaos und Co Neuer Therapieansatz für die häufigsten Probleme bei Kindern Wahrnehmungsstörungen Lernprobleme Konzentrations- und Aufmerksamkeitsstörungen In Fallbeispielen berichten Kinder und Eltern über ihre Erfahrungen Hyperaktivität Lese- und Rechtschreibprobleme Rechnen und Aufmerksamkeitsstörungen in der Schule Machtkämpfe um Hausaufgaben und das Abtauchen in die mediale Welt des iPads und Co bestimmen den Alltag vieler Familien Dass diesen Störungsbildern häufig Wahrnehmungs- und Informationsverarbeitungsstörungen zugrunde liegen
