Context-Aware Systems and Applications Phan Cong Vinh,Abdur Rakib,2022-01-06 This book constitutes the refereed post conference proceedings of the International Conference on Context Aware Systems and Applications held in October 2021 Due to COVID 19 pandemic the conference was held virtually The 25 revised full papers presented were carefully selected from 52 submissions The papers cover a wide spectrum of modern approaches and techniques for smart computing systems and their applications

Streaming vs Theaters Ethan Parker,AI,2025-02-24 Streaming vs Theaters investigates the dramatic shift in the film industry examining the growing tension between streaming services and traditional movie theaters It addresses whether the conventional theatrical model can thrive amidst on demand entertainment detailing how streaming platforms like Netflix and Disney have reshaped movie consumption One intriguing fact is the significant impact of streaming on movie budgets forcing a reevaluation of established industry practices The book offers a structured analysis supported by box office data subscriber statistics and industry reports making it valuable for anyone seeking a deep understanding of this evolving landscape The book explores the economic disruption caused by streaming the changing consumer behavior and the effects on filmmaking It provides a historical overview of the film industry from its early beginnings to the rise of home entertainment setting the stage for the streaming revolution It argues that streaming isn't just a new distribution method but a fundamental change in how movies are made distributed and experienced Beginning with the history and economics of both theaters and streaming the book progresses to analyze the ascent of streaming platforms and their impact on movie budgets and release strategies It concludes by examining potential future scenarios for the industry considering co existence and the evolution of cinematic art while also addressing debates around theatrical exclusivity and the impact of algorithms on film selection

Probing auditory scene analysis Elyse S Sussman,Susan Denham,Susann Deike,2015-02-11 In natural environments the auditory system is typically confronted with a mixture of sounds originating from different sound sources As sounds spread over time the auditory system has to continuously decompose competing sounds into distinct meaningful auditory objects or auditory streams referring to certain sound sources This decomposition work which was termed by Albert Bregman as Auditory scene analysis ASA involves two kinds of grouping to be done Grouping based on simultaneous cues such as harmonicity and on sequential cues such as similarity in acoustic features over time Understanding how the brain solves these tasks is a fundamental challenge facing auditory scientist In recent years the topic of ASA was broadly investigated in different fields of auditory research including a wide range of methods studies in different species and modeling Despite the advance in understanding ASA it still proves to be a major challenge for auditory research This includes verifying whether experimental findings are transferable to more realistic auditory scenes A central approach in understanding ASA is the use of certain stimulus parameters that produce an ambiguous percept The advantage of such an approach is that different perceptual organizations can be studied without varying physical stimulus parameters Additionally

the perception of ambiguous stimuli can be volitionally controlled by intention or task. By using this one can mirror real hearing situations where listeners intent to identify and to localize auditory sources. Recently it was also found that in classical auditory streaming sequences perceptual ambiguity was not restricted to but was observed over a broad range of stimulus parameters. The proposed Research Topic pursues to bring together scientist in the different fields of auditory research whose work addresses the issue of perceptual ambiguity. Researchers were welcome to contribute experimental reports computational modeling and reviews that consider auditory ambiguity in its modality specific characteristics as well as in comparison to visual ambiguous figures. The overall goal of contributions was to consider the experimental findings from the perspective of real auditory scenes. In a broader sense the Research Topic was open for contributions which are related to the issue of active listening in complex scenes.

U.S. Geological Survey Circular, 1984 **Data Streams** Charu C. Aggarwal, 2007-04-03 This book primarily discusses issues related to the mining aspects of data streams and it is unique in its primary focus on the subject. This volume covers mining aspects of data streams comprehensively each contributed chapter contains a survey on the topic the key ideas in the field for that particular topic and future research directions. The book is intended for a professional audience composed of researchers and practitioners in industry. This book is also appropriate for advanced level students in computer science.

Relevant Query Answering over Streaming and Distributed Data Shima Zahmatkesh, Emanuele Della Valle, 2020-01-21 This book examines the problem of relevant query answering over the Web and provides a comprehensive overview of relevant query answering over streaming and distributed data. In recent years Web applications that combine highly dynamic data streams with data distributed over the Web to provide relevant answers have attracted increasing attention. Answering in a timely fashion i.e. reactively is one of the most important performance indicators especially when the distributed data is evolving. The book proposes a solution that retains a local replica of the distributed data and offers various maintenance policies to refresh the replica over time. A limited refresh budget guarantees the reactivity of the system. Focusing on stream processing and Semantic Web it appeals to scientists and graduate students in the field.

An Assessment Methodology for Determining Historical Changes in Mountain Streams Mark G. Smelser, John C. Schmidt, 1998 Successful management of water in mountain streams by the USDA Forest Service requires that the link between resource development and channel change be documented and quantified. The characteristics of that linkage are unclear in mountain streams and the adjustability of these streams to land use and hydrologic change has been argued in court. One way to quantify the adjustability of a stream is to examine its geomorphic history. An excellent source of historic geomorphic data are the records associated with stream gaging stations maintained by the U.S. Geological Survey. This report describes what records are available how to organize the data on computer spreadsheets and discusses 6 techniques that quantify the spatial and temporal magnitude of historic channel adjustments. The discharge measurements include physical measurements of the channel. In particular USGS discharge measurements include physical measurements

of the channel By analyzing these measurements collectively it is possible to quantify monthly annual and decadal scales of adjustment Once the history of channel adjustment is determined it can be compared to histories of climate change flow regulation and land use These comparisons may link the geomorphic adjustments to particular patterns events or activities Resource managers can use this knowledge to better assess the ramifications of resource development land use and restoration efforts on mountain stream systems

Music Streaming Around the World David Hesmondhalgh,2025 A free ebook version of this title is available through Luminos University of California Press s Open Access publishing program Visit www.luminosoa.org to learn more Music streaming platforms such as Spotify Apple Music YouTube and those offered by Chinese web giant Tencent are now central to everyday musical activity across much of the world with enormous ramifications for musical culture in modern

societies Bringing together case studies from twelve countries Music Streaming around the World provides the first international account of how streaming is shaping music culture today by considering the implications of streaming platforms for the production distribution and consumption of recorded music around the globe Impacts of Climate on Renewable Groundwater Resources and/or Stream-Aquifer Interactions Francisco Javier Alcalá, David Pulido-Velázquez, Luis Ribeiro, 2021-07-27 The book collects seven original contributions in the field of climate and underlying human influences on renewable groundwater resources and or stream aquifer interactions The first contribution introduces the following six ones into the overall framework of the topic The second contribution assesses the impact of climate change scenarios on land subsidence related to groundwater level depletion in detrital aquifers The third contribution studies the patterns of river infiltration and the associated controlling factors by using a combination of field investigations and modeling techniques The fourth contribution introduces a method to improve the modeling of streamflow in high permeability bedrock basins receiving interbasin groundwater flow The fifth contribution discusses the role of resilience of hydrogeological systems affected by either climate and or anthropic actions in order to understand how anticipating negative changes and preserving its services The sixth contribution analyzes the water balance of wetlands which are systems highly sensitive to climate change and human action The seventh contribution identifies groundwater bodies with low vulnerability to pumping to be used as potential buffer values for sustainable conjunctive use management during droughts Computer Vision - ECCV 2016 Bastian Leibe, Jiri Matas, Nicu Sebe, Max Welling, 2016-09-15 The eight volume set comprising LNCS volumes 9905 9912 constitutes the refereed proceedings of the 14th European Conference on Computer Vision ECCV 2016 held in Amsterdam The Netherlands in October 2016 The 415 revised papers presented were carefully reviewed and selected from 1480 submissions The papers cover all aspects of computer vision and pattern recognition such as 3D computer vision computational photography sensing and display face and gesture low level vision and image processing motion and tracking optimization methods physics based vision photometry and shape from X recognition detection categorization indexing matching segmentation grouping and shape representation statistical methods and learning video events activities and surveillance applications They are organized in topical sections on detection recognition and retrieval scene understanding optimization image and video processing learning action activity and tracking 3D and 9 poster sessions *Modelling Spark Ignition Combustion* P. A. Lakshminarayanan, Avinash Kumar Agarwal, Haiwen Ge, J. M. Mallikarjuna, 2024-05-15 The book provides a comprehensive overview of combustion models used in different types of spark ignition engines In the first generation of spark ignition SI engines the turbulence is created by the shear flow passing through the intake valves and significantly decays during the intake and compression strokes The residual turbulence enhances the laminar flame velocity which is characteristic of the fuel and increases the relative effectiveness of the engine In this simple two zone model the turbulence is estimated empirically the spherical flame propagation model considers ignition delay thermodynamics heat

transfer and chemical equilibrium to obtain the performance and emissions of an SI engine The model is used extensively by designers and research engineers to handle the fuel air mixture prepared in the inlet and different geometries of open combustion chambers The empiricism of the combustion model was progressively dismantled over the years New 3D models for ignition considering the flow near a spark plug and flame propagation in the bulk gases were developed by incorporating solutions to Reynolds averaged Navier Stokes RANS equations for the turbulent flow with chemical reactions in the intense computational fluid dynamics The models became far less empirical and enabled treating new generation direct injection spark ignition DISI gasoline and gas engines The more complex layout of DISI engines with passive or active prechamber is successfully handled by them This book presents details of models of SI engine combustion progressively increasing in complexity making them accessible to designers researchers and even mechanical engineers who are curious to explore the field This book is a valuable resource for anyone interested in spark ignition combustion
