Business Mathematics William L. Kindsfather, W. Alton Parish, 2003

Business Mathematics by Kindsfather Parish was written with the student in mind. Presenting mathematical concepts in a clear and understandable manner is necessary in all math texts, but the business uses of mathematics are crucial when presenting math in a business context. Business Mathematics' unique approach is based on the idea that it is easier to understand how to do the math if you also understand how it is used in business. Light On Snow Anita Shreve, 2014-11-27

I watched my father run forward in his snowshoes the way one sometimes does in dreams, unable to make the legs move fast enough. I ran to the place where he knelt. I looked down into the sleeping bag. A tiny face gazed up at me, the eyes wide despite their many folds. The baby was wrapped in a bloody towel and its lips were blue. The events of a December afternoon on which a father and his daughter find an abandoned infant in the snow will forever alter eleven year old Nicky Dillon's understanding of the world which she is about to enter and the adults who inhabit it: a father who has taken great pains to remove himself from society in order to put behind him an unthinkable tragedy; a young woman who must live with the consequences of the terrible choices she has made; and a detective whose cleverness is superseded only by his sense of justice. Written from the point of view of thirty year old Nicky as she recalls the vivid images of that fateful December, hers is a tale of love and courage, of tragedy and redemption, and of the ways in which the human heart always seeks to heal itself.
