Agricultural Economics, **The Washington Apple** Amanda L. Van Lanen, 2022-09-29 In the nineteenth century most American farms had a small orchard or at least a few fruit bearing trees People grew their own apple trees or purchased apples grown within a few hundred miles of their homes Nowadays in contrast Americans buy mass produced fruit in

supermarkets and roughly 70 percent of apples come from Washington State So how did Washington become the leading producer of America s most popular fruit In this enlightening book Amanda L Van Lanen offers a comprehensive response to this question by tracing the origins evolution and environmental consequences of the state s apple industry Washington s success in producing apples was not a happy accident of nature according to Van Lanen Apples are not native to Washington any more than potatoes are to Idaho or peaches to Georgia In fact Washington apple farmers were late to the game lagging their eastern competitors The author outlines the numerous challenges early Washington entrepreneurs faced in such areas as irrigation transportation and labor Eventually with crucial help from railroads Washington farmers transformed themselves into growers by embracing new technologies and marketing strategies By the 1920s the state s growers managed not only to innovate the industry but to dominate it Industrial agriculture has its fair share of problems involving the environment consumers and growers themselves In the quest to create the perfect apple early growers did not question the long term environmental effects of chemical sprays Since the late twentieth century consumers have increasingly questioned the environmental safety of industrial apple production Today as this book reveals the apple industry continues to evolve in response to shifting consumer demands and accelerating climate change Yet through it all the Washington apple maintains its iconic status as Washington s most valuable agricultural crop

Agricultural Marketing ,1964 *Sebastopol's Gravenstein Apple Industry* ,2011 The Gravenstein apple has been etched into the identity of Sebastopol California which is one of the few places on earth to have extensively grown this elusive apple The Gravenstein is an early apple whose only failing is perishability but it is celebrated for its superior flavor Yet Luther Burbank attempted to improve on the Gravenstein producing the Winterstein and the Bonita for home gardeners During the last 127 years the Gravenstein has added millions of dollars to the local economy It has provided a reason for celebrations from the 1910 Apple Show to today s Apple Blossom Festival and Gravenstein Apple Fair This is the Gravenstein s story from its European roots to small town homage and the part this special apple has played in one community and the reason the current decline in apple acreage is mourned
