Learning Yeong-Ju Lee, 2025-08-22 This book explores creative uses of social media for informal language learning. It focuses on the underexplored area of how informal language learning adapts to technological innovations in two multimodal media sharing platforms, TikTok and Instagram. Drawing on ecological perspectives of language learning and spatial understandings of digital technology and learning, the research reported in this book unpacks how social media technologies are used for language learning. It presents insights from a dual-level qualitative methodological design: a comparative study of public online data of social media posts collected from TikTok and Instagram and a multiple case study based on ethnographic narrative data gathered from participants' journal entries, stimulated recall interviews, and social media posts. This book reveals the dynamic landscape of digital language learning that is being integrated into learners' everyday lives through multimodal content creation and networking. This book enriches readers' understanding of social media's role in language learning and offers pedagogical strategies for teachers to integrate newer technologies and multimodal materials into language classrooms to enhance students' learning experiences.

Musicking TikTok Juan Bermúdez, 2024-12-12

This ethnographic work about TikTok's musicking in a global Austrian context complements and builds upon ethnomusicological assumptions, theories, and methods for the study of musical practices in digital spaces. An overview of elements that make up TikTok's interface, as well as the technical performative possibilities that it allows, this book introduces a general categorization of existing performance types and how

TikTokers appropriate the platform to make their music It illustrates how some TikTokers became aware of and began using TikTok and it reviews some of the different strategies TikTokers apply to learn how to use the application and successfully develop their performances Berm dez explores how performers move from being ordinary users to becoming TikTokers developing and performing an identity he calls TikTok Persona Moreover he discusses how some TikTok practices can and have occurred across multiple interconnected platforms and he examines how localities are articulated and negotiated in these contexts Berm dez argues for an understanding of musicking as a multimedia practice that different actors create and experience individually in everyday synchronous and asynchronous physical and digital situations The so called TikTokers create a sense of identity and community through their performances This study suggests that a digital performance can be aside from a representation of reality an integral part of it serving as a fundamental space for constructing and performing identity
