

SOLID GOLD

Shaping the future

Solid Gold HyperBeam 100-CD Jukebox

We've long made the most advanced, most reliable, most feature-packed compact disc jukeboxes in the industry. Strong claims, yes, but not exaggerations. They've been proven time and time again, both in controlled studies and on the street.

If our jukebox design task was, then, simply to create a new model to satisfy this moment of time, it would be quite easy. But that's not the case. Our task was to create a product that will not be

readily outmoded by rapidly advancing technology ... to design a jukebox that takes full advantage of technology available today, but can adapt to the certainty of changes in digital and communication technology forthcoming. Changes that promise to impact the jukebox industry every bit as much — *if not more* — than the change from 45 RPM records to compact disc in the first place.

Introducing the Solid Gold 100-CD HyperBeam jukebox.

It's everything operators need to maximize their jukebox earnings today. Yet it takes into account changes that digital technology may likely demand tomorrow.

And that's the single biggest difference between the Solid Gold and everything else on the market today.

The most advanced system in the world.

- The world's fastest 100-CD single player changer. More paid-for plays compressed into less time.
- The most protective CD handling & storage system. Mechanism never so much as touches a CD; just the trays they're "cradled" in.
- The most convenient music loading & updating system. Two 50-CD capacity magazines snap in & out instantly.
- "Live performance" HyperBeam sound.
- "Picture Display" title strip mechanism with palm-press search button. Less than 70 seconds to speed view all titles.
- Title strip holder lock-out ... Jukebox can lock and set full with as few as 4 CDs.
- Amplifier overload protection.
- A real time clock. On-off automation of features and functions.
- Literally hundreds of programmable features for "location tailoring." Automatic intermingling of patron selections. Maximum song play-length control. Automatic override of background music by paid-for selections. Much more.
