With *Linux Networking Cookbook* you'll dive straight into the gnarly hands-on work of building and maintaining a computer network. Running a network doesn't mean you have all the answers. Networking is a complex subject with reams of reference material that's difficult to keep straight, much less remember. If you want a book that lays out the steps for specific tasks that clearly explains the commands and configurations and does not tax your patience with endless ramblings and meanderings into theory and obscure RFCs, this is the book for you. You will find recipes for: Building a gateway firewall and wireless access point on a Linux network; Building a VoIP server with Asterisk; Secure remote administration with SSH; Building secure VPNs with OpenVPN and a Linux PPTP VPN server; Single sign-on with Samba for mixed Linux/Windows LANs; Centralized network directory with OpenLDAP; Network monitoring with Nagios or MRTG; Getting acquainted with IPv6; Setting up hands-free networks; Installations of new systems; Linux system administration via serial console. And a lot more. Each recipe includes a clear hands-on solution with tested code plus a discussion on why it works. When you need to solve a network problem without delay and don't have the time or patience to comb through reference books or the Web for answers, *Linux Networking Cookbook* gives you exactly what you need.
