resulting near misses in the US which average more than one per month Nuclear Roulette chronicles the problems of aging reactors uncovers the costly challenge of decommissioning explores the industry's greatest seismic risks not on California's quake prone coast but in the Midwest and Southeast and explains how solar flares could black out power grids causing the world's 400 plus reactors to self destruct This powerful expos concludes with a roundup of proven and potential energy solutions that can replace nuclear technology with a Renewable Renaissance combined with conservation programs that can cleanse the air and cool the planet **Japan's March 2011 Disaster and Moral Grit** Michael C. Brannigan, 2015-08-27

Japan's March 11 2011 triple horror of earthquake tsunami and nuclear meltdown is its worst catastrophe since Hiroshima and Nagasaki Recovery remains an ongoing ordeal Japan's Responses to the March 2011 Disaster Our Inescapable In between uncovers the pivotal role of longstanding cultural worldviews and their impact on responses to this gut wrenching disaster Through unpacking the pivotal notion in Japanese ethics of *aidagara* or in betweenness it offers testament to a deep rooted sense of community Accounts from survivors victims families key city officials and volunteers reveal a remarkable fiber of moral grit and resilience that sustains Japan's common struggle to rally and carve a future with promise and hope Calamities snatch us out of the mundane and throw us into the intensity of the moment They challenge our moral fiber Trauma individual and collective is the uninvited litmus test of character personal and social Ultimately whether a society rightfully recovers from disaster has to do with its degree of connectedness the embodied physical interpersonal face to face engagement we have with each other As these stories bring to light along with Michael Brannigan's extensive research personal encounters with survivors and experience as a volunteer in Japan's stricken areas our degree of connectedness determines how we in the long run weather the storm whether the storm is natural technological or human Ultimately it illustrates that how we respond to and recover after the storm hinges upon how we are with each other before the storm

Dreaming the Future Ken Ausubel, 2012 In a collection of short witty poignant even humorous essays Ausubel tracks the big ideas emerging trends and game changing developments of our time He guides us through our watershed moment showing how it's possible to emerge from a world where corporations are citizens the gap between rich and poor is cavernous and biodiversity and the climate are under assault and create a world where we take our cues from nature and focus on justice equity diversity democracy and peace **Lynn Margulis** Dorion Sagan, 2012-10-19 Tireless controversial

and hugely inspirational to those who knew her or encountered her work Lynn Margulis was a scientist whose intellectual energy and interests knew no bounds Best known for her work on the origins of eukaryotic cells the Gaia hypothesis and symbiogenesis as a driving force in evolution her work has forever changed the way we understand life on Earth When Margulis passed away in 2011 she left behind a groundbreaking scientific legacy that spanned decades In this collection Dorion Sagan Margulis's son and longtime collaborator gathers together the voices of friends and colleagues to remark on her life and legacy in essays that cover her early collaboration with James Lovelock her fearless face off with Richard

Dawkins during the so called Battle of Balliol at Oxford the intrepid application of her scientific mind to the insistence that 9 11 was a false flag operation her affinity for Emily Dickinson and more Margulis was elected to the National Academy of Sciences in 1983 received the prestigious National Medal of Science in 1999 and her papers are permanently archived at the Library of Congress Less than a month before her untimely death Margulis was named one of the twenty most influential scientists alive one of only two women on this list which include such scientists as Stephen Hawking James Watson and Jane Goodall Although she could be a bulldog her heart was soft and her spirit loving beneath the scientific realpolitik of her conversation and the insistent tough mindedness of her sometimes strident and blunt withering and refreshingly unadorned opinions Dorion Sagan from the introduction

The Zero Waste Solution Paul Connett, 2013-10-09 Waste is something we all make every day but often pay little attention to That s changing and model programs around the globe show the many different ways a community can strive for and achieve zero waste status Scientist turned activist Paul Connett a leading international figure in decades long battles to fight pollution has championed efforts to curtail overconsumption and keep industrial toxins out of our air and drinking water and bodies But he s best known around the world for leading efforts to help communities deal with their waste in sustainable ways in other words to eliminate and reuse waste rather than burn it or stow it away in landfills In *The Zero Waste Solution* Connett profiles the most successful zero waste initiatives around the world showing activists planners and entrepreneurs how to re envision their community s waste handling process by consuming less turning organic waste into compost recycling reusing other waste demanding nonwasteful product design and creating jobs and bringing community members together in the process The book also exposes the greenwashing behind renewed efforts to promote waste incinerators as safe nontoxic energy suppliers and gives detailed information on how communities can battle incineration projects that even at their best emit dangerous particles into the atmosphere many of which remain unregulated or poorly regulated An important toolkit for anyone interested in creating sustainable communities generating secure local jobs and keeping toxic alternatives at bay

Nuclear Power Harry Henderson, 2014-05-12 Provides timely and up to date facts context perspectives and tools to make informed decisions about nuclear energy In the 21st century nuclear power has been identified as a viable alternative to traditional energy sources to stem global climate change and condemned as risky to human health and environmentally irresponsible Do the advantages of nuclear energy outweigh the risks especially in light of the meltdown at the Fukushima plant in 2011 This guide provides both a comprehensive overview of this critical and controversial technology presenting reference tools that include important facts and statistics biographical profiles a chronology and a glossary It covers major controversies and proposed solutions in detail and contains contributions by experts and important stakeholders that provide invaluable perspective on the topic
