While Google doesn't specify a recommended length for SEO title tags, some say the ideal length is between 50–60 characters. This length is associated with higher search clicks and is less likely to be rewritten by Google. Most desktop and mobile browsers can display the first 50–60 characters of a title tag, and research suggests that titles under 60 characters have about a 90% chance of displaying properly in search engine results pages (SERPs). However, Google's title update prefers shorter titles, and titles that are too long are more likely to be rewritten.
