Individualism and the Rise of Democracy in Poland Tomek Grabowski, 2023 This book investigates the long term preconditions of lasting and successful democratization It counters conventional wisdom that they are a matter of proper institutional design or that the political culture of democracy is a by product of modernizing economic change Instead it argues that achieving lasting democracy is difficult without a prior breakthrough to individualism a system of beliefs centered on the belief in one's inner worth and in one's inner capacity for judgment The rise of an individualist belief system that is widely proliferated in society requires social conditions that are in turn hard to meet including a widespread breakdown of traditional culture a frontier experience and a process of civic nation building The book's empirical focus Poland demonstrates the logic of the individuation process in a condensed form Poland's road to individualism and with it to democracy consisted of a catastrophic uprooting of broad segments of society in the aftermath of World War II the rise of a frontier environment in the Western Territories acquired from Germany and an unlikely emergence of the Catholic Church as a civic nation builder in these Territories in the 1960s and the 1970s However the Polish case is not unique and the book offers an analytical approach that could successfully be brought to bear on other cases of democratization both past and present
