Advances in Cognitive Research, Artificial Intelligence and Neuroinformatics Boris M. Velichkovsky, Pavel M. Balaban, Vadim L. Ushakov, 2021-04-17 This book reports on theoretical and experimental research answering key questions in neuroscience, philosophy of mind, and cognitive research. It gives a special emphasis on findings achieved within the territory of the former U S S R which has remained largely unknown to an international readership. The volume gathers authoritative studies on cognitive development, consciousness, attention, and perception. It covers research on eye movements, language, speech, and semantics, emotion, as well as brain functional states and a variety of decision-making processes. It also highlights important advances in cognitive robotics and artificial intelligence, discussing brain-computer interfaces and other practically relevant technologies. It includes studies on human subjects in both healthy and disease conditions and investigations on the molecular mechanisms of cognition in animal models. Chapters are based on invited lectures and peer-reviewed contributions to the 9th International Conference on Cognitive Sciences Intercogsci 2020 held on October 10-16, 2020 in Moscow. The conference was organized by the Interregional Association of Cognitive Studies with the participation of the Pavlov Society for Neurophysiology and Higher Nervous Activity and supported by the Russian Academy of Sciences, the Russian Foundation for Basic Research, and a number of the north-eastern European research institutions. All in all, this book provides cognitive scientists around the world with a timely snapshot of interdisciplinary research and cutting-edge models and a major source of inspiration for future collaborations in the areas of artificial intelligence and cognitive neuroscience.
