

ChatGPT

ChatGPT, short for Chat Generative Pre-trained Transformer, is an Artificial Intelligence (AI) program developed by OpenAI (American Artificial Intelligence Research Laboratory). It was launched in November 2022 and it has become a hit.

The tool is a chatbot (software application used to maintain an online chat through text using natural language) which incorporates different techniques to generate human-like answers in a conversational way.

ChatGPT is programmed to understand verbal language. The algorithm it uses is fuelled with massive amounts of data allowing the software to give sophisticated answers in a human-like way. 300 billion words were fed into the system. The program was asked to produce a variety of responses to different questions. Human experts ranked the answers in order, from best to worst. This has enabled the software to gather the correct information and frame a natural response. The chatbot is able to learn as it is exposed to human language. With every input written by users, it "gets smarter" as it remembers previous prompts given improving reactions to specific situations.

Even if ChatGPT's main function is to answer in a conversational manner, it can write essays, research papers, articles, job application letters, poems, songs, produce images, produce sounds, produce videos, automate workflows and even play certain games. The program is also really successful in offering thoughtful responses regarding legal matters, ethics and people's emotions and feelings safeguarding all of those involved. Its functions seem to grow and grow as the chatbot continues to update. Although the web is in English, ChatGPT understands and answers in several languages.

As every tool, ChatGPT has its limitations. Some of the answers the model provides are inaccurate or even incorrect. When questions asked are "simple" and the
