ELECTRONICS LAB MANUAL

(VOLUME 2) NAVAS, K. A., 2018-10-01 This book is evolved from the experience of the author who taught all lab courses in his three decades of teaching in various universities in India The objective of this lab manual is to provide information to undergraduate students to practice experiments in electronics laboratories This book covers 118 experiments for linear analog integrated circuits lab communication engineering lab power electronics lab microwave lab and optical communication lab The experiments described in this book enable the students to learn Various analog integrated circuits and their functions Analog and digital communication techniques Power electronics circuits and their functions Microwave equipment and components Optical communication devices This book is intended for the B Tech students of Electronics and Communication Engineering Electrical and Electronics Engineering Biomedical Electronics Instrumentation and Control Computer Science and Applied Electronics It is designed not only for engineering students but can also be used by BSc MSc

Physics and Diploma students KEY FEATURES Contains aim components and equipment required theory circuit diagram pin outs of active devices design tables graphs alternate circuits and troubleshooting techniques for each experiment Includes viva voce and examination questions with their answers Provides exposure on various devices TARGET AUDIENCE B Tech Electronics and Communication Engineering Electrical and Electronics Engineering Biomedical Electronics Instrumentation and Control Computer Science and Applied Electronics BSc MSc Physics Diploma Engineering Lab Manual ,2022-12-28 This Book contains the manuals for Microwave Engineering Laboratory and Mobile Communication System Laboratory The purpose of laboratory activities is to familiarize students with setting up microwave benches and working with rectangular waveguides also to identify distinct microwave components properties and measure wave parameters including impedance frequency wavelength and power After finishing this lab course students will be able to use microwave equipment comprehend microwave measurements and examine the properties of microwave components The goals of the Mobile Communication System Laboratory are to comprehend the interdependence of cellular system design parameters investigate orthogonality conditions for CDMA systems classify different types of propagation models and analyse the link budget and comprehend the working principles of OFDM MIMO and cognitive radio Outcomes will be able to demonstrate the effect of cellular system design parameters on system capacity and quality of service compare and contrast trunking radio systems examine the effect of small scale fading parameters on radio channel performance and describe the features of OFDM MIMO and cognitive radio **Microwave Engineering Laboratory Manual** James Wigle,2012-04-25 This text intends to supplement Dr Wigle s University of Colorado at Colorado Springs Microwave Measurements Laboratory ECE 4150 and ECE 5150 The content is written for undergraduate and graduate courses in applied microwave engineering and laboratory measurements The intent is not to replace textbooks describing electromagnetics field theory but focus upon real world applied applications experiments and measurements Therefore minimal theory will be provided within verbal course content This material is designed for students having successfully completed two undergraduate courses in electromagnetic field theory The course should expose students to equipment and techniques used in microwave experiments as well as the design of microwave circuits and microwave experiments Suitable for basic laboratory courses in electromagnetics Rules of thumb practical info Essential electromagnetic basics to perform experiments Microwave component parameters Decibel math
