[Pipeline for Automated Code Generation from Backlog Items \(PACGBI\)](#) Mahja Sarschar, 2025-01-31 This book investigates the potential and limitations of using Generative AI GenAI in terms of quality and capability in agile web development projects using React For this purpose the Pipeline for Automated Code Generation from Backlog Items PACGBI was implemented and used in a case study to analyse the AI generated code with a mix method approach The findings demonstrated the ability of GenAI to rapidly generate syntactically correct and functional code with Zero Shot prompting The PACGBI showcases the potential for GenAI to automate the development process especially for tasks with low complexity However this research also identified challenges with code formatting maintainability and user interface implementation attributed to the lack of detailed functional descriptions of the task and the appearance of hallucinations Despite these limitations the book underscores the significant potential of GenAI to accelerate the software development process and highlights the need for a hybrid approach

that combines GenAI's strengths with human expertise for complex tasks. Further, the findings provide valuable insights for practitioners considering GenAI integration into their development processes and set a foundation for future research in this field.

Das aktuelle große Interesse liegt darin, begründet dass es in den vergangenen Jahren verschiedene technologische Fortschritte gab, welche die Nutzung der KI nun auf andere Ebenen heben. Mit diesem Themenband des Instituts für Innovation und Technik (IIT) Künstliche Intelligenz erhalten Leserinnen und Leser einen schlaglichtartigen Einblick in die KI hinsichtlich ihrer Technologien, aktuellen und potenziellen Anwendungen sowie Auswirkungen auf die Gesellschaft.
