web may 6 2022 the parent function of all linear functions is the equation $y = x$ this means that the rest of the functions that belong in this family are simply the result of the parent function being transformed take a look at the graphs of a family of linear functions with $y = x$ as the parent function

parent functions transformation activities tpt - Jul 03 2022

web this activity contains a set of 40 puzzle pieces on transformations of parent functions students will cut out the pieces and match equation to its graph transformations and type of function the function types included in this product are absolute value quadratic square root and cubic

results for parent graphing project tpt - Aug 04 2022

web project guidelines and rubric for a project on the trigonometric functions sine cosine tangent students select one of the functions add their own transformations to the parent function graph their function and describe the effect of the transformations
