Global University Rankings T. Erkkilä, 2013-09-26 *Global University Rankings* explores the novel topic of global university rankings and their effects on higher education in Europe. The contributions in this volume outline different discourses on global university rankings and explore the related changes concerning European higher education policies, disciplinary traditions, and higher education institutions. The first global university rankings were published less than a decade ago, but these policy instruments have become highly influential in shaping the approaches and institutional realities of higher education. The rankings have portrayed European academic institutions in a varying light. There is intense reflexivity over the figures, leading to ideational changes and institutional adaptation that take surprisingly similar forms in different European countries. The contributions in this book critically assess global university rankings as a policy discourse that would seem to be instrumental to higher education reform throughout Europe.

Universities and the Public Sphere Brian Pusser, Ken Kempner, Simon Marginson, Imanol Ordorika, 2012-05-22 Universities have been propelled into the center of the global political economy of knowledge production by a number of factors: mass education, academic capitalism, the globalization of knowledge, the democratization of communication in the era of the Internet, and the emergence of the knowledge and innovation economy. The latest book in the *International Studies in Higher Education* series, *Universities and the Public Sphere*, addresses the vital role of research universities as global public spheres—sites where public interaction, conversation, and deliberation take place where the nature of the State and private interests can be openly debated and contested. At a time of increased privatization, open markets, and government involvement in higher education, the book also addresses the challenges facing the university in its role as a global public sphere. In this volume, international contributors challenge prevalent views of the global marketplace to create a deeper understanding of higher education's role in knowledge creation and nation building. In nearly every national context, the pressures of globalization, neo-liberal economic restructuring, and new managerial imperatives challenge traditional norms of autonomy, academic freedom, access, and affordability. The authors in *Universities and the Public Sphere* argue that universities are uniquely suited to have transformative democratic potential as global public spheres.

Dismantling Global White Privilege Chandran Nair, 2022-01-04 White privilege damages and distorts societies around the world, not just in the United States. This book exposes its pervasive global reach and creates a new space for discourse on worldwide racial equality. As Chandran Nair shows in this uncompromising new book, a belief in the innate superiority of White people and Western culture, once the driving force behind imperialism, is now woven into the very fabric of globalization. It is so insidious that, as Nair points out, even many non-White people have internalized it, judging themselves by an alien standard. It has no rival in terms of longevity, global reach, harm done, and continuing subversion of other cultures and societies. Nair takes a comprehensive look at the destructive influence of global White privilege. He examines its impact on geopolitics, the reframing of world history, and international business practices. In the soft power

spheres of White privilege entertainment the news media sports and fashion he offers example after example of how White cultural products remain the aspirational standard Even environmentalism has been corrupted dominated by a White savior mentality whereby technologies and practices built in the West will save the supposedly underdeveloped poorly governed and polluted non Western world For all these areas Nair gives specific suggestions for breaking the power of White privilege It must be dismantled not just because it is an injustice but also because we will be creating a post Western world that has less conflict is more united and is better able to respond to the existential challenges facing all of us Intelligent Information and Database Systems Ngoc-Thanh Nguyen,Boonwat Attachoo,Bogdan Trawinski,Kulwadee Somboonviwat,2014-02-28 The two volume set LNAI 8397 and LNAI 8398 constitutes the refereed proceedings of the 6th Asian Conference on Intelligent Information and Database Systems ACIIDS 2014 held in Bangkok Thailand in April 2014 The 125 revised papers presented were carefully reviewed and selected from 300 submissions The papers address the following topics natural language and text processing intelligent information retrieval semantic Web social networks and recommendation systems intelligent database systems decision support systems computer vision techniques and machine learning and data mining The papers are organized in topical sections on multiple model approach to machine learning MMAML 2014 computational intelligence CI 2014 engineering knowledge and semantic systems IWEKSS 2014 innovations in intelligent computation and applications IICA 2014 modeling and optimization techniques in information systems database systems and industrial systems MOT 2014 innovation via collective intelligences and globalization in business management ICIGBM 2014 intelligent supply chains ISC 2014 and human motion acquisition processing analysis synthesis and visualization for massive datasets HMMD 2014
