Dear Mr. Deniro,

Please accept my enclosed application for the position of administrative assistant at Tech Corporation. Having read through your job description, I am thrilled to be applying for this position as my 6 years of experience and skillset match the requirements you're looking for.

At my current company, Redford & Sons, I am valued by the CEO and his staff as a critical support pillar for the team, keeping meetings, papers, travel arrangements, and office items organized at all times. I spearheaded the effort to "go digital" for almost all planning and paperwork, increasing office efficiency to the point of saving \$3,000 per year in contracted labor expenses.

I was also tasked with training two administrative assistants in my previous position, proving that I can perform the all necessary duties described in your job description, and even train others in how to perform in this role effectively, should the need arise.

I would love to have to opportunity to join the team at Tech Company and use my skills to create an efficient and stress free office environment for your executives. I believe I can meet and exceed the expectations you have for this role. I look forward to speaking more with you about my candidacy. Feel free to contact me at any time.

Best,
Kelly Blackwell

Measuring Service Performance Ralf Lisch, 2016-05-06 In service societies the tertiary sector has long become the primary sector in terms of GDP and employment Quality research and testing means better service and success in the service industries

demands quality Nonetheless complaints about insufficient inconsistent or bad service abound Quality decides on success and failure Where so much is at stake management decisions call for systematic research and consumers look for relevant results that provide guidance in complex markets Research into quality and customer satisfaction gets to the core of a business However many so called studies hardly meet essential criteria of empirical research and deliver artefacts rather than facts This book puts an end to common misconceptions of quality studies Measuring Service Performance is an appeal for an approach to quality research that meets quality criteria itself It is a compelling argument against widespread but rather dubious dealings with measurement data and statistics Ralf Lisch calls for a reconsideration of the research process focussing on content instead of method and adding meaning to results Because service excellence deserves research excellence Written in a practical accessible style the book offers practitioners as well as market researchers MBA students and others involved in the service sector a critical analysis and discussion of the essentials of Practical Research for Better Quality
