Liebman, Shawn Crowley, Andrew Markquart, Lauren Rosenberg, 2014-07-08 In 1989 Texas executed Carlos DeLuna a poor Hispanic man with childlike intelligence for the murder of Wanda Lopez a convenience store clerk His execution passed unnoticed for years until a team of Columbia Law School faculty and students almost accidentally chose to investigate his case and found that DeLuna almost certainly was innocent They discovered that no one had cared enough about either the defendant or the victim to make sure the real perpetrator was found Everything that could go wrong in a criminal case did This book documents DeLuna s conviction which was based on a single nighttime cross ethnic eyewitness identification with no corroborating forensic evidence At his trial DeLuna s defense that another man named Carlos had committed the crime was not taken seriously The lead prosecutor told the jury that the other Carlos Carlos Hernandez was a phantom of DeLuna s imagination In upholding the death penalty on appeal both the state and federal courts concluded the same thing Carlos Hernandez did not exist The evidence the Columbia team uncovered reveals that Hernandez not only existed but was well known to the police and prosecutors He had a long history of violent crimes similar to the one for which DeLuna was executed Families of both Carloses mistook photos of each for the other and Hernandez s violence continued after DeLuna was put to death This book and its website thewrongcarlos.net reproduce law enforcement crime lab lawyer court social service media and witness records as well as court transcripts photographs radio traffic and audio and videotaped interviews documenting one of the most comprehensive investigations into a criminal case in U S history The result is eye opening yet may not be unusual Faulty eyewitness testimony shoddy legal representation and prosecutorial misfeasance continue to put innocent people at risk of execution The principal investigators conclude with novel suggestions for improving accuracy among the police prosecutors forensic scientists and judges New York State Route 20N , *Navigation by Judgment* Dan Honig, 2018-03-29 Foreign aid organizations collectively spend hundreds of billions of dollars annually with mixed results Part of the problem in these endeavors lies in their execution In *Navigation by Judgment* Dan Honig argues that high quality implementation of foreign aid programs often requires contextual information that cannot be seen by those in distant headquarters Drawing on a novel database of over 14 000 discrete development projects across nine aid agencies and eight paired case studies of development projects Honig shows that aid agencies will often benefit from giving field agents the authority to use their own judgments to guide aid delivery This navigation by judgment is particularly valuable when environments are unpredictable and when accomplishing an aid program s goals is hard to accurately measure Highlighting a crucial obstacle for effective global aid *Navigation by Judgment* shows that the management of aid projects matters for aid effectiveness *Hands-On Data Visualization* Jack Dougherty, Ilya Ilyankou, 2021-03-11 Tell your story and show it with data using free and easy to learn tools on the web This introductory book teaches you how to design interactive charts and customized maps for your website beginning with simple drag and drop tools such as Google Sheets Datawrapper and Tableau Public You ll also gradually learn how to edit open source code
