Exploring STEM Environments that Broaden Participation Tyrslai Williams, Renã A. S. Robinson,Zakiya S. Wilson-Kennedy,2025-09-16 Creating spaces conducive for all students pursuing degrees in STEM is a constant conversation in higher education Studies establish the need for broad participation in STEM and the barriers in place that prevent matriculation through critical junctures Through these studies several suggestions and recommendations suggest supporting students through advising mentoring and research experience Very little is discussed about the tools and strategies needed to enhance students own development of self efficacy and self identity through mentorship in formal environments like the lab classroom and departments but also in informal STEM environments like bridge programs organizational involvement and mentoring groups While the environments seem very different the mission of dynamic approaches to student progression is apparent Furthermore understanding how the support evolves at each critical juncture is critical to the way in which the future of STEM will advance
