

Thermo Scientific Microm HM 550

The HM 550 provides a perfect solution for high volume, demanding clinical and research environments.

Best-in-Class Sectioning

The Automatic Cryo Approach (ACA) advances specimens to the knife's edge and stepping motor technology delivers more consistent sections.

With a patented vacutome to flatten sections, Peltier and cryochamber temperature from 0–35°C, best-in-class sectioning is ensured.

Low-Fatigue Ergonomics

The HM 550 allows users to sit or stand and operate controls on the left and right of the arm rests.

A convenient LCD display, movable chamber illumination to reduce glare and the ability to motorize sectioning by foot or hand reduce the fatigue associated with other cryostats.

Unmatched Protection

User safety and infection control permeates the HM 550. The specimen holder always stops in the down position for unimpeded access to the tissue section and an emergency stop is accessible by either foot or control panel.

The unique debris removal system and state-of-the-art disinfection system ensure user safety.

The HM 550 Chamber

- 1 Twelve specimen stage stations, including four cooling to -60°C.
- 2 Object cooling head for independent specimen control to -50°C.
- 3 Vacutome gently pulls sections under the anti-roll plate creating reproducible wrinkle-free sections.

Microm Hm550 Manual
