Microsoft Office 2010 For Teachers 4th Edition:

Powerful PowerPoint for Educators David M. Marcovitz, 2012-05-15 This timely book helps educators unleash the interactive potential of PowerPoint to build their own multimedia material that perfectly matches the needs of their students. While PowerPoint affords powerful capabilities for creating dynamic classroom lessons and enriching curriculum, few educators understand how to take advantage of these built-in features. The second edition of this practical guide helps educators produce creative multimedia material for their students regardless of their level of programming proficiency. **Powerful PowerPoint for Educators Using Visual Basic for Applications to Make PowerPoint Interactive Second Edition** discusses the educational benefits of multimedia instruction and provides a review of intermediate PowerPoint skills. Author David Marcovitz explains the concept of Visual Basic for Applications (VBA) scripting and provides progressively advanced skills and practice examples. While other books that describe VBA are written in a highly technical manner, this book is geared toward educators with little or no programming background and includes tips for modifying the practice examples for their own interactive multimedia projects.

INTRODUCTION TO INFORMATION TECHNOLOGY, THIRD EDITION

RAJARAMAN, V., 2018-01-01 This textbook is designed to teach a first course in Information Technology (IT) to all undergraduate students. In view of the all-pervasive nature of IT in today's world, a decision has been taken by many universities to introduce IT as a compulsory core course to all Bachelor's degree students regardless of their specialisation. This book is intended for such a course. The approach taken in this book is to emphasize the fundamental Science of Information Technology rather than a cook book of skills. Skills can be learnt easily by practice with a computer and by using instructions given in simple web lessons that have been cited in the References. The book defines Information Technology as the technology that is used to acquire, store, organize, process, and disseminate processed data, namely information. The unique aspect of the book is to examine processing all types of data: numbers, text, images, audio, and video data. As IT is a rapidly changing field, we have taken the approach to emphasize reasonably stable fundamental concepts on which the technology is built. A unique feature of the book is the discussion of topics such as image, audio, and video compression technologies from first principles. We have also described the latest technologies such as e-wallets and cloud computing. The book is suitable for all Bachelor's degree students in Science, Arts, Computer Applications, and Commerce. It is also useful for general reading to learn about IT and its latest trends. Those who are curious to know the principles used to design jpg, mp3, and mpeg4 compression, the image formats bmp, tiff, gif, png, and jpg, search engines, payment systems such as BHIM and Paytm, and cloud computing to mention a few of the technologies discussed will find this book useful. **KEY FEATURES** Provides comprehensive coverage of all basic concepts of IT from first principles. Explains acquisition, compression, storage, organization, processing, and dissemination of multimedia data. Simple explanation of mp3, jpg, and mpeg4 compression. Explains how computer networks and the Internet work and their applications. Covers business data processing, World Wide Web, e-commerce, and IT.

laws Discusses social impacts of IT and career opportunities in IT and IT enabled services Designed for self study with every chapter starting with learning objectives and concluding with a comprehensive summary and a large number of exercises

Henfield,Ahmad R. Washington,2015-11-01

Discussions and research related to the salience of Black male student needs and development in relation to their general success and well being is well documented in many fields Indeed many studies have found that healthy masculine identity development is associated with a number of positive outcomes for males in general including Black males In school counseling literature however this discussion has been relatively absent particularly regarding those students living in urban contexts Indeed research devoted to the study of Black males in the school counseling literature focuses almost exclusively on race and issues associated with its social construction with only cursory if any attention given to their masculine identity development as a function of living in urban communities and attending urban schools Based on this lack of information it is probably a safe assumption that intentional systematic culturally relevant efforts to assist Black males in developing healthy achievement and masculine identities based on their unique personal social academic experiences and future career goals are not being applied by school counselors concerned with meeting students needs School counselors are in a unique position nonetheless to lend their considerable expertise insights training and skills to improving life outcomes among Black males a population who are consistently in positions of risk according to a number of quality of life indicators Without knowledge and awareness of Black males masculine identity development in urban areas coupled with the requisite skills to influence the myriad factors that enhance and impede healthy development in such environments they are missing out on tremendous opportunities which other professions appear to understand and quite frankly seem to take more seriously As such this book proposes to accomplish two specific goals 1 Highlight the plight of Black males with specific emphasis on the ecological components of their lives in relation to current school culture and trends 2 Encourage school counselors to give more thought to Black male identity development that takes into consideration differential experiences in society as a whole and schools in particular as a function of the intersection of their race as well as their gender The first rationale for this book then is to highlight the plight of Black males with specific emphasis on the ecological components of their lives in relation to current school culture and trends e g standards based accountability

practices in urban environments However I recognize the role of school counselors has never been fully integrated into educational reform programs As such their positions are often unregulated and determined by people in positions of power who do not understand their training job specific standards and thus potential impact on the lives of Black male students As a result their vast potential to develop strong interventions designed to address the myriad racial and masculine factors that serve to enhance and impede Black males academic achievement is often unrealized Therefore the second reason for this special issue is to include the scholarship of professional school counselors and counselor educators with policy change in mind Scholars will be invited to contribute manuscripts that explore race masculinity and academic achievement in relation to the role of school counselors This is designed to encourage school counselors and counselor educators to give more thought to Black male identity development that takes into consideration differential experiences in society as a whole and schools in particular as a function of the intersection of their race as well as their gender

Pedagogy Martha M. A. Zama, Margaret Nalova Endeley, 2023-02-24 General Pedagogy A Guide to Effective Teaching demystifies the scientific art of teaching by providing facts principles and concrete examples in real life situations such that neither the novice teacher who peruses it will stutter in front of students on the first day of school nor will the experienced teacher write and execute the same old lesson plans on that day The best teachers are those who show you where to look but don't tell you what to see is a popular quote attributed to Alexandra K Trenfor which aptly summarises the kind of teachers this book intends to produce when used as a teacher training resource Real teachers facilitate learning they do not simply tell learners the answers to their questions and concerns Accordingly the authors take the readers through well researched themes in the academic discipline of teaching wherein they present analyse and discuss pertinent issues Although they provide useful suggestions for teaching success the authors encourage teachers to interpret facts ideas and suggestions presented against the sociocultural contexts of their practice The materials are presented creatively while adding a personal touch intended to facilitate effective and efficient learning For coherence and better comprehension the book has been carefully crafted in eighteen chapters lodged in six parts The first part introduces the reader to the concepts of teaching and teaching effectiveness The theoretical underpinnings of these concepts are brought out in the second part which paves the way for the third part that describes generic teaching approaches strategies and methods Part four and five comprise essential teaching skills and teaching tools for the 21st century while part six wraps up with the transition from teacher training laboratories to classrooms in the real world The last two chapters intentionally prepare the teacher to overcome challenges of professional work in contemporary African classrooms
