Wissenschaft weltoffen 2021 DZHW, DAAD, 2022-01-12 The study has been analysing the international nature of studies research and universities in Germany since 2001 As well as highlighting the trends in the German higher education and research sector it presents data relating to particularly relevant study regions such as the USA the United Kingdom and Asia The study integrates the international data published by the OECD and UNESCO with the national data from the Federal Statistical Office In combination with other indicators it provides

a valid basis for long term analysis Wissenschaft weltoffen is published as separate German and English editions It is available free of charge at wbv open access de **The Status of Youth in Agrifood Systems** Food and Agriculture Organization of the United Nations, The world s agrifood systems stand at a crossroads With 1.3 billion youth globally the future of food livelihoods and economic resilience depends on their participation in agrifood systems At the same time agrifood systems need youth to drive productivity innovation and sustainability in a crucial and rapidly evolving sector FAO s The Status of Youth in Agrifood Systems report is a call to action It presents the most comprehensive evidence based analysis of youth in agrifood systems to date highlighting both the opportunities and structural barriers that shape their engagement It explores how transforming agrifood systems can enhance decent job opportunities and food security for youth and how empowered youth can drive this transformation It concludes highlighting policy recommendations and areas of investments to foster more equitable and sustainable agrifood systems where rural youth are both beneficiaries and leaders of change

The Future of Foods Maria G. Corradini, Tatiana Koutchma, Noemi Elisabet Zaritzky, Isabel Sousa, 2025-09-10 The future of food can take many avenues of exploration from the product itself such as unusual sources like grass microalgae acorns and so on to by products from the food industry e.g. fruit pomaces and brewer spent grains to disruptive technologies from data management and integration e.g. digital twins to processing e.g. additive manufacturing precision fermentations cell ag When considering the future of food sometimes this is more accurately seen as the cycle of food Development is continual but sometimes to address the future we must look historically for example a resurgence in pulses for protein or the increase in shelf stable foods due to the Covid 19 pandemic The future of food requires many considerations such as life cycle assessment customization social impact environmental impact and economic impact In particular when developing new foods with sustainability in mind e.g. alternative proteins one has to take into account the health benefits as well as indulgence and sensory appeal and these factors must be weighed against the financial cost of the production processes and the ultimate cost to the consumer

Evolution Of Global Crustal Uplift And Depression, The: Changes Of Sea And Land Yuzhu Kang, Zhihong Kang, Zhijiang Kang, Jiwei Wang, 2024-03-14 The dynamic mechanism of plate tectonics remains a reasonable theory but one with shortcomings such as insufficient bases for plate division unclear plate boundaries and unclear geological characteristics This book proposes that the world s continents should not be divided by plates and that their formation is not due to plate tectonics but rather due to global crustal uplift evolution and sea land evolution This proposal is based on the authors broad theoretical foundation and comprehensive professional knowledge built up over more than ten years of in depth research by many scholars on the evolution of the Earth s continents In this book many case studies are better explained by global crustal uplift and sea land evolution Namely that the entire continents of the world are indivisible and the changes of each land block over geological periods resulted from the sea land changes The book further develops the original geomechanics theory created by the famous geologist Li Siguang As a vibrant and highly rigorous work Prof Li s

book offered important theoretical guidance that enriched the global geological community and led to a re development within geological science The strong response highlights the significance of geomechanics theory and our theories that build upon it in this book *Regional Economic Outlook Update: Middle East and Central Asia, January 2024* International Monetary Fund.
