Manganiello, 2009 This reader gathers fifteen of the most important essays written in the field of southern environmental

history over the past decade. Ideal for course use, the volume provides a convenient entrance into the recent literature on the region as it indicates the variety of directions in which the field is growing. As coeditor Paul S. Sutter writes in his introduction, recent trends in environmental historiography—a renewed emphasis on agricultural landscapes and their hybridity, attention to the social and racial histories of environmental thought and practice, and connections between health and the environment among them—have made the South newly attractive terrain. This volume suggests then that southern environmental history has not only arrived but also that it may prove an important space for the growth of the larger environmental history enterprise. The writings, which range in setting from the Texas plains to the Carolina Lowcountry, address a multiplicity of topics such as husbandry practices in the Chesapeake colonies and the aftermath of Hurricane Andrew. The contributors varied disciplinary perspectives, including agricultural history, geography, the history of science, the history of technology, military history, colonial American history, urban and regional planning history, and ethnohistory, also point to the field's vitality. Conveying the breadth, diversity, and liveliness of this maturing area of study, *Environmental History and the American South* affirms the critical importance of human environmental interactions to the history and culture of the region. Contributors: Virginia DeJohn Anderson, William Boyd, Lisa Brady, Joshua Blu Bhuis, Judith Carney, James Taylor, Carson Craig, E. Colten, S. Max Edelson, Jack Temple Kirby, Ralph H. Lutts, Eileen Maura McGurty, Ted Steinberg, Mart Stewart, Claire Strom, Paul Sutter, Harry Watson, Albert G. Way. *Champion*, Sally M. Walker, 2018-03-06.

American chestnut trees were once found far and wide in North America's eastern forests. They towered up to one hundred feet tall, providing food and shelter for people and animals alike. For many, life without the chestnut seemed unimaginable until disaster struck in the early 1900s. What began as a wound in the bark of a few trees soon turned to an unstoppable killing force. An unknown blight was wiping out the American chestnut, and scientists felt powerless to prevent it. But the story doesn't end there. Today the American chestnut is making a comeback. Narrative nonfiction master Sally M. Walker tells a tale of loss, restoration, and the triumph of human ingenuity in this beautifully photographed middle-grade book. *The Longest No*, Stephanie Choi, 2024-05-06.

The Longest No embraces and complicates what it means to err, to wander, or go astray—a deviation from a code of behavior or truth, a mistake, flaw, or defect. Beginning with the collection's title, which combines a colloquial Cantonese phrase, *Leng No* (Pretty Girl), and the English suffix for the superlative degree, *-est*, these poems wander, deviate, and flow across bodies, geographies, and languages. In this collection from Stephanie Choi, you'll find the poet's tongue writing herself learning to speak. *Hemlock*, Anthony D'Amato, Benjamin Baiser, Aaron M. Ellison, David Foster, David Orwig, Wyatt Oswald, Audrey Barker Plotkin, Jonathan Thompson, 2014-04-29.

An appreciation of the beautiful, iconic, and endangered Eastern Hemlock and what it means to nature and society. The Eastern Hemlock, massive and majestic, has played a unique role in structuring northeastern forest environments from Nova Scotia to Wisconsin and through the Appalachian Mountains to North Carolina, Tennessee, and Alabama. A foundation species influencing all the species in the ecosystem surrounding it.

this iconic North American tree has long inspired poets and artists as well as naturalists and scientists Five thousand years ago the hemlock collapsed as a result of abrupt global climate change Now this iconic tree faces extinction once again because of an invasive insect the hemlock woolly adelgid Drawing from a century of studies at Harvard University s Harvard Forest one of the most well regarded long term ecological research programs in North America the authors explore what hemlock s modern decline can tell us about the challenges facing nature and society in an era of habitat changes and fragmentation as well as global change

Blue Ridge Commons Kathryn Newfont, 2012 In the late twentieth century residents of the Blue Ridge mountains in western North Carolina fiercely resisted certain environmental efforts even while launching aggressive initiatives of their own Kathryn Newfont provides context for those events by examining the environmental history of this region over the course of three hundred years identifying what she calls commons environmentalism a cultural strain of conservation in American history that has gone largely unexplored Efforts in the 1970s to expand federal wilderness areas in the Pisgah and Nantahala national forests generated strong opposition For many mountain residents the idea of unspoiled wilderness seemed economically unsound historically dishonest and elitist Newfont shows that local people s sense of commons environmentalism required access to the forests that they viewed as semipublic places for hunting fishing and working Policies that removed large tracts from use were perceived as enclosure and resisted Incorporating deep archival work and years of interviews and conversations with Appalachian residents Blue Ridge Commons reveals a tradition of people building robust forest protection movements on their own terms p 4 of cover

The Poco Field Talmage A. Stanley, 2012-03-15 In this beautifully written meditation on identity and place Talmage A Stanley tells the story of his grandparents middle class aspirations from the 1920s to the 1940s in the once booming Pocahontas coalfields of southern West Virginia Part lyrical family memoir and part social study The Poco Field An American Story of Place addresses a long standing gap in Appalachian and American studies illustrating the lives and choices of the middle class in the mid twentieth century and delving into questions of place based identity Exploring the natural and built environments of the towns of Keystone West Virginia and Newbern Virginia Stanley delineates the history of conflict and control of local industry and development Through his grandparents struggle for upward mobility into the middle class Stanley narrates a history that counters ideas of Appalachia as an exception to American culture and history presenting instead an image of the region as an emblem of America at large Stanley builds out from family and local history to examine broad structures of values and practices as they reflect and relate to place showing how events such as the development of extensive mineworks the ghettoization of the area s black residents the catastrophic flooding of the Elkhorn Creek and the fraud induced failure of Keystone National Bank signal values that erode a place both literally and figuratively Giving voice to activists now working to break down boundaries and assumptions that long have defined and restricted the middle class in the global economy The Poco Field also champions the creative potential of place for reinvigorating democratic society for the twenty first century

The Renewable Energy Transition John Erik Meyer, 2019-10-18 Canada is a well endowed country that serves as an ideal model to lead the reader through the

development of energy resources and society historically and into a post carbon future The book provides an historical perspective and describes the physical resource limitations energy budgets and climate realities that will determine the potential for any transition to renewable energy Political and social realities including jurisdiction and energy equality issues are addressed However we cannot simply mandate or legislate policies according to social and political aspirations Policies must comply with the realities of physical laws such as the energy return on investment EROI for fossil fuel based and renewable energy systems EROI is discussed in both historical terms and in reference to the greater efficiencies inherent in a distributed generation mainly electric post carbon society Meyer explores the often misleading concepts and terms that have become embedded in society and tend to dictate our policy making as well as the language social and personal goals and metrics that need to change before the physical transition can begin at the required scale This book also reviews what nations have been doing thus far in terms of renewables including the successes and failures in Canada and across the globe Ontario s green energy fiasco and a comparison of the different circumstances of Norway and Alberta for example are covered as part of the author s comparison of a wide range of countries What are the achievements plans and problems that determine how well different countries are positioned to make the transition The transition path is complex and the tools we need to develop and the physical infrastructure investments we need to make are daunting At some point in time Canada and Canadians like all nations will be living on 100% renewable energy Whether the social and technological level that endures sees us travelling to the stars or subsisting at a standard of living more similar to the pre fossil fuel era is far from certain
