This book is intended to be a comprehensive and standard textbook for undergraduate students of Microeconomics. Apart from providing students with sufficient study material for examination purpose, it aims at making them understand economics. An effort has been made to explain abstract and complex microeconomic theories in a simple and lucid language without sacrificing analytical sophistication. The subject matter has been structured in a systematic manner without leaving gaps for the readers to fill in. Though the approach is non-mathematical, simple algebra has been used to give a concrete view of economic concepts and theories and to show the applicability of economic theories in decision making.

This book attempts to answer the question: what on earth is the Marxist political philosophy? The author discusses Karl Marx's vision of the good life and the good society, focusing in particular on the interrelationship between property and justice. Strictly speaking, the subject of this book should not be placed within an a priori conceptual framework which essentially focuses on academic notions of the good society, good government, and justice. However, for the purposes of this book, Marxist political philosophy, namely communism, is already embodied in two aspects. This book argues that it is the noisy and confusing modern political philosophy that obscures the actualization of human nature unfolded by the Marxist political philosophy before us. The book will be essential reading for students and scholars of philosophy, Marxism, Chinese studies, and Chinese Marxist philosophy.
