Microprocessor Based Parallel Architecture For Reliable Digital Signal Processing Systems Computer Science Engineering:

Microprocessor-Based Parallel Architecture for Reliable Digital Signal Processing Systems Alan D.

George, 2018-01-18 This book presents a distributed multiprocessor architecture that is faster more versatile and more reliable than traditional single processor architectures It also describes a simulation technique that provides a highly accurate means for building a prototype system in software The system prototype is studied and analyzed using such DSP applications as digital filtering and fast Fourier transforms The code is included as well which allows others to build software prototypes for their own research systems The design presented in Microprocessor Based Parallel Architecture for Reliable Digital Signal Processing Systems introduces the concept of a dual mode architecture that allows users a dynamic choice between either a conventional or fault tolerant system as application requirements dictate This volume is a must have for all professionals in digital signal processing parallel and distributed computer architecture and fault tolerant computing

Digital Signal Processing Algorithms Hari Krishna, 2017-11-22 Digital Signal Processing Algorithms describes computational number theory and its applications to deriving fast algorithms for digital signal processing It demonstrates the importance of computational number theory in the design of digital signal processing algorithms and clearly describes the nature and structure of the algorithms themselves The book has two primary focuses first it establishes the properties of discrete time sequence indices and their corresponding fast algorithms and second it investigates the properties of the discrete time sequences and the corresponding fast algorithms for processing these sequences Digital Signal Processing Algorithms examines three of the most common computational tasks that occur in digital signal processing namely cyclic convolution acyclic convolution and discrete Fourier transformation The application of number theory to deriving fast and efficient algorithms for these three and related computationally intensive tasks is clearly discussed and illustrated with examples Its comprehensive coverage of digital signal processing computer arithmetic and coding theory makes Digital Signal Processing Algorithms an excellent reference for practicing engineers The authors intent to demystify the abstract nature of number theory and the related algebra is evident throughout the text providing clear and precise coverage of the quickly evolving field of digital signal processing *Scientific and Technical Aerospace Reports*, 1995

Masters Theses in the Pure and Applied Sciences W. H. Shafer, 2013-03-14 Masters Theses in the Pure and Applied Sciences was first conceived published and disseminated by the Center for Information and Numerical Data Analysis and Synthesis CINDAS at Purdue University in 1957 starting its coverage of theses with the academic year 1955 Beginning with Volume 13 the printing and dissemination phases of the activity were transferred to University Microfilms Xerox of Ann Arbor Michigan with the thought that such an arrangement would be more beneficial to the academic and general scientific and technical community After five years of this joint undertaking we had concluded that it was in the interest of all concerned if the printing and distribution of the volume were handled by an international publishing house to assure improved service and broader dissemination Hence starting with Volume 18 Masters Theses in the Pure and Applied Sciences has been disseminated on a worldwide basis by Plenum Publishing Corporation of New York and in the same year the coverage was broadened to include Canadian universities All back issues can also be ordered from Plenum We have reported in Volume 24 thesis year 1979 a total of 10 033 theses titles from 26 Canadian and 215 United States universities We are sure that this broader base for theses titles reported will greatly enhance the value of this important annual reference work While Volume 24 reports these submitted in 1979 on occasion certain universities do report theses submitted in previous years but not reported at the time
