Training the Senior Executive

It's hard to change conventional thinking about how the organization can be most effectively run, and that's why the senior executive must be trained.

Abstract—This study was designed to determine the effect of a 10-week, 100-hr, nonclinical, predoctoral internship on the self-reported confidence of students in their ability to perform various tasks associated with the practice of counseling. The results of the study indicated that students who completed the internship reported significantly higher confidence in their ability to perform various tasks associated with the practice of counseling than students who did not complete the internship.
