argued here that accountability has emerged to become a concept with adjectives and there is a real need to properly understand accountability in an increasingly fractured world The theoretical and analytical glue that binds all of the chapters in this collection is a commitment to working within the contours of the work of the philosopher Giovanni Sartori This is an approach that has been used to tease apart and interrogate a range of concepts including terrorism governance coups gender equality deliberation warfare clientelism hybrid regimes democracy right through to art love rape and violence It is also an approach that facilitates the cultivation of complex debates concerning the limits of conceptual flexibility The volume consists of twelve chapters grouped into three main parts The introductory part provides the foundations for the collection Part I on Power explores the normative dimensions of accountability as a means to control and regulate power Part II on Politics focuses inter alia on accountability following a period of crisis and the emergence of new technology such as algorithms The final part Part III on Particularities looks at concepts such as social accountability and what is meant by supplementary accountability This broad ranging collection increases the conceptual toolkit that social and political scientists and lawyers can use to interrogate change at a number of levels and in a range of sectors Whether through a focus on moral individual or gendered accountability or through a shift towards clashing stakeholder or social accountability there is a clear flow and coherence through the chapters The volume will be of interest to academics and researchers working in the areas of Legal and Political Theory Legal and Political Philosophy and Accountability Studies **Advances in Wireless**
