Defensible Space on the Move Loretta Lees, Elanor Warwick, 2022-02-02 Both theoretically informed and empirically rich Defensible Space makes an important conceptual contribution to policy mobilities thinking to policy and practice and also to practitioners handling of complex spatial concepts Critically examines the geographical concept Defensible Space which has been influential in designing out crime to date and has been applied to housing estates in the UK North America Europe and beyond Evaluates the movement mobility mobilisation of defensible space from the US to the UK and into English housing policy and practice Explores the multiple ways the concept of defensible space was interpreted and implemented as it circulated from national to local level and within particular English housing estates Critiquing and pushing forwards work on policy mobilities the authors illustrate for the first time how transfer mechanisms worked at both a policy and practitioner level Drawing on extensive archival research oral histories and in depth interviews this important book reveals defensible space to be ambiguous uncertain in nature

neither proven or disproven scientifically **Sustainability in Energy and Buildings 2020** John Littlewood, Robert J. Howlett, Lakhmi C. Jain, 2020-12-07 This book contains the proceedings of the 12th KES International Conference on Sustainability and Energy in Buildings 2020 SEB20 held in Split Croatia during 24-26 June 2020 organized by KES International. SEB20 invited contributions on a range of topics related to sustainable buildings and explored innovative themes regarding sustainable energy systems. The aim of the conference is to bring together researchers and government and industry professionals to discuss the future of energy in buildings, neighbourhoods and cities from a theoretical, practical, implementation and simulation perspective. The conference formed an exciting chance to present, interact and learn about the latest research and practical developments on the subject. The conference attracted submissions from around the world. Submissions for the Full Paper Track were subjected to a blind peer review process. Only the best of these were selected for presentation at the conference and publication in these proceedings. It is intended that this book provides a useful and informative snapshot of recent research developments in the important and vibrant area of sustainability in energy and buildings.

Metric Handbook Pamela Buxton, 2018-02-23 Significantly updated in reference to the latest construction standards and new building types. Sustainable design integrated into chapters throughout. Over half of the entire book has now been updated since 2015. Over 100 000 copies sold to successive generations of architects and designers. This book belongs in every design office. The Metric Handbook is the major handbook of planning and design data for architects and architecture students. Covering basic design data for all the major building types, it is the ideal starting point for any project. For each building type, the book gives the basic design requirements and all the principal dimensional data and succinct guidance on how to use the information and what regulations the designer needs to be aware of. As well as buildings, the Metric Handbook deals with broader aspects of design such as materials, acoustics and lighting and general design data on human dimensions and space requirements. The Metric Handbook is the unique reference for solving everyday planning problems.

The Housing Design Handbook David Levitt, Jo McCafferty, 2018-10-04 Everyone deserves a decent and affordable home, a truth almost universally acknowledged. But housing in the UK has been in a state of crisis for decades, with too few homes built, too often of dubious quality and costing too much to buy or rent. It doesn't have to be like this. Bringing together a wealth of experience from a wide range of housing experts, this completely revised edition of The Housing Design Handbook provides an authoritative, comprehensive and systematic guide to best practice in what is perhaps the most contentious and complex field of architectural design. This book sets out design principles for all the essential components of successful housing design, including placemaking, typologies and density, internal and external space, privacy, security, tenure and community engagement, illustrated with case studies of schemes by architecture practices working across the UK and continental Europe. Written by David Levitt and Jo McCafferty, two recognised authorities in the field, and with contributions from more than twenty other leading practitioners, The Housing Design Handbook is an essential

reference for professionals and students in architecture and design as well as for government bodies housing associations and other agencies involved in housing

Residential Construction Law Philip Britton, Matthew Bell, Deirdre Ní Fhloinn, Kim Vernau, 2021-07-15 This is the first book to offer a systematic and analytical overview of the legal framework for residential construction In doing so the book addresses two fundamental questions Prevention What assurances can the law give buyers and later owners and occupiers of homes that construction work from building of a complete home to adding an extension or replacing a shower unit will comply with minimum standards of design safety and build quality Cure What forms of redress from whom and by what route can residents expect when often long after completion of construction they discover defects The resulting problems pose some big and difficult questions of principle and policy about standards rights and remedies which in turn concern justice more generally This book addresses these key issues in a comparative context across the United Kingdom Ireland Australia and New Zealand It is an accessible guide to the existing law for residents and construction professionals and their legal advisers but also charts a course to further meaningful reforms of the legal landscape for residential construction around the world The book s two co authors Philip Britton and Matthew Bell have taught in the field in the UK Australia and New Zealand both have been active in legal practice as have the book s two specialist contributors Deirdre Ní Fhloinn and Kim Vernau

Airborne Occupational Hazards in Sewer Systems Amy Forsgren, Kristina Brinck, 2016-12-01 Sewer systems fall into the category out of sight out of mind they seldom excite interest But when things go wrong with the air in the sewer system they go very wrong Consequences can be dramatic and devastating sewer workers killed instantly by poisonous gas when they lift a sewer lid or entire suburban blocks levelled by explosions This book describes the atmospheric dangers commonly found in the sewer system It provides easily understood explanations of the science behind the hazards combined with real life examples of when things went dramatically wrong
