Challenges, Prospects and Opportunities Nana #N/A, 2017-07-05 As the 15 year Millennium Development Goals approach their conclusion we can now measure their larger successes and failures in more than snapshot fashion and we can begin to consider how best to shape the international development agenda for the coming decades based on what we have learned But the performance and outlook for the MDGs can neither be reduced to the sum of its eight goals nor be divorced from international dynamics the hard interests of states and other actors and the global dynamics that impact on both For that reason this volume balances contextual analysis the role of formative and constraining forces the importance of normative considerations and illuminating case studies to deliver a study of the MDGs which has depth and nuance as well as breadth Poised between judging the recent performance and the future promise of the MDGs this book is substantial provocative and timely This book was published as a special issue of Third World Quarterly **Bangladesh's Economic and Social**

Weidman, W. James Jacob, 2012-01-01. We are pleased to introduce this inaugural volume in the PSCIE Series *Beyond the Comparative Advancing Theory and Its Application to Practice* which expands on the life work of University of Pittsburgh Professor Rolland G Paulston. 1929-2006. Recognized as a stalwart in the field of comparative and international education, Paulston's most widely recognized contribution is in social cartography. He demonstrated that mapping comparative international and development education CIDE is no easy task and depending on the perspective of the mapper there may be multiple cartographies to chart. The 35 contributors to this volume representing a range of senior and junior scholars from various CIDE backgrounds and perspectives celebrate the life and work of Paulston by addressing issues, perspectives, and approaches related to charting the future course of the field. The volume reports on new research in several genres as well as conceptual analysis. As the title suggests, authors were encouraged to go beyond established canons of CIDE. The cover art, *The CIDE Theoretical Compass*, was conceptualized by the editors and depicts that theory selection and theory generation are an ongoing and important process in comparative international and development education CIDE. The image was designed by artist Natalie Jacob which positions the CIDE Theoretical Compass over Rolland G Paulston's 1993 concentric circle map.
