NOTE: This form is used by a buyer, owner or their agent when locating the most advantageous adjustable rate mortgage (ARM) financing available for funding the purchase or refinance of a property, to provide a checklist for conducting an interview with mortgage lenders and noting for comparison the terms they offer on an ARM.

DATE: _____, 20____, at _____, California.

Items left blank or unchecked are not applicable.

FACTS:

This ARM worksheet discloses the terms of a loan plan entitled: _____
from _____ (Lender) by _____ (Loan Officer)
for property referred to as: _____

INTEREST RATE:

1. The Note Rate of interest for this loan is comprised of a percentage figure from the selected rate index and the life-of-loan percentage margin agreed to. When the rate index figure changes prior to a scheduled adjustment in the note rate, the change will be reflected in an increase or decrease in the note rate on your loan.
2. The Note Rate is adjusted each _____ month(s) with the first adjustment _____
 - 2.1 Each Note Rate adjustment is ☐ unrestricted, or ☐ capped to increase no more than _____% or decrease no more than _____%.
 - 2.2 During the life of the loan, the interest rate will not exceed _____% (the Note Ceiling Rate) and will not be less than _____% on your loan.
3. The initial interest rate is _____% and is not based on a rate index figure or the lender's margin rate for this loan.
 - 3.1 The initial interest rate is in effect for a period of _____ month(s).
4. *Note rate for this loan is calculated as follows: (index + margin = Note Rate)*
 - 4.1 Rate index name _____
 - 4.2 Rate index percentage figure (current) _____%
 - 4.3 Percentage margin offered by lender (constant) _____(+)%
 - 4.4 **Note Rate** of interest (current) _____(=)%
 - 4.5 The Note Rate will be adjusted if a change occurs in the rate index figure (§4.2 above).

PAYMENT SCHEDULES:

5. ☐ Full amortization at all times during the life of the loan is a feature of this loan.
 - 5.1 The life of this loan is for a term of _____ years.
 - 5.2 Monthly payment due during the initial _____ month(s) of the loan will be \$_____.
 - 5.3 The amount of the monthly payment will be adjusted each _____ month(s) during the life of this loan.
 - 5.4 The first adjustment in the amount of the monthly payment will occur _____.
 - 5.5 The amount of the monthly payment at the Current Note Rate (§4.4 above) of _____% would be _____.
 - 5.6 The amount of the monthly payment at the Note Ceiling Rate (§2.2 above) of _____% would be _____.
 - 5.7 The amount of the monthly payment on a 15-year amortization payment schedule at the Note Ceiling Rate (§2.2 above) would be \$_____.
6. ☐ Interest only payments are a feature of this loan. This interest only payment schedule feature avoids any build-up in principal through negative amortization.
 - 6.1 The amount of the monthly payments on this loan will be adjusted each _____ month(s) during the _____ year life of the loan, with the first adjustment to occur _____.

Common Sense Mathematics: Second Edition Ethan D. Bolker, Maura B. Mast, 2021-01-21 Ten years from now what do you want or expect your students to remember from your course We realized that in ten years what matters will be how students approach a problem using the tools they carry with them common sense and common knowledge not the particular mathematics we chose for the curriculum Using our text students work regularly with real data in moderately complex everyday contexts using mathematics as a tool and common sense as a guide The focus is on problems suggested by the news of the day and topics that matter to students like inflation credit card debt and loans We use search engines calculators and spreadsheet programs as tools to reduce drudgery explore patterns and get information Technology is an integral part of today's world this text helps students use it thoughtfully and wisely This second edition contains revised chapters and additional sections updated examples and exercises and complete rewrites of critical material based on feedback from students and teachers who have used this text Our focus remains the same to help students to think carefully and critically about numerical information in everyday contexts Introduction to Financial Mathematics Kevin J. Hastings, 2024-11-27 The second edition of this successful and widely recognized textbook again focuses on discrete topics The author recognizes two distinct paths of study and careers of actuarial science and financial engineering This text can be very useful as a common core for both Therefore there is substantial material in Introduction to Financial Mathematics Second Edition on the theory of interest the first half of the book as well as the probabilistic background necessary for the study of portfolio optimization and derivative valuation the second half A course in multivariable calculus is not required The material in the first two chapters should go a long way toward helping students prepare for the Financial Mathematics FM actuarial exam Also the discrete material will reveal how beneficial it is for the students to know more about loans in their personal financial lives The notable changes and updates to this edition are itemized in the Preface but overall the presentation has been made more efficient One example is the chapter on discrete probability which is rather unique in its emphasis on giving the deterministic problems studied earlier a probabilistic context The section on Markov chains which is not essential to the development has been scaled down Sample spaces and probability measures random variables and distributions expectation conditional probability independence and estimation all follow Optimal portfolio selection coverage is reorganized and the section on the practicalities of stock transactions has been revised Market portfolio and Capital Market Theory coverage is expanded New sections on Swaps and Value at Risk have been added This book like the first edition was written so that the print edition could stand alone At times we simplify complicated algebraic expressions or solve systems of linear equations or numerically solve non linear equations Also some attention is given to the use of computer simulation to approximate solutions to problems Mathematical Interest Theory: Third Edition Leslie Jane Federer Vaaler, Shinko Kojima Harper, James W. Daniel, 2021-04-15 Mathematical Interest Theory provides an introduction to how investments grow over

time This is done in a mathematically precise manner The emphasis is on practical applications that give the reader a concrete understanding of why the various relationships should be true Among the modern financial topics introduced are arbitrage options futures and swaps Mathematical Interest Theory is written for anyone who has a strong high school algebra background and is interested in being an informed borrower or investor The book is suitable for a mid level or upper level undergraduate course or a beginning graduate course The content of the book along with an understanding of probability will provide a solid foundation for readers embarking on actuarial careers The text has been suggested by the Society of Actuaries for people preparing for the Financial Mathematics exam To that end Mathematical Interest Theory includes more than 260 carefully worked examples There are over 475 problems and numerical answers are included in an appendix A companion student solution manual has detailed solutions to the odd numbered problems Most of the examples involve computation and detailed instruction is provided on how to use the Texas Instruments BA II Plus and BA II Plus Professional calculators to efficiently solve the problems This Third Edition updates the previous edition to cover the material in the SOA study notes FM 24 17 FM 25 17 and FM 26 17 *Heinemann Higher Mathematics* David Clarke,1998 This text covers higher mathematics course units providing students with graded exercises from basic to exam standard worked examples demonstrating how to lay out the answers key topic summaries and revision exercises including past exam questions

About Mathematics Gerald R. Rising,James R. Matthews,Eileen Schoaff,Judith Matthew,2021 Mathematics is an essential component of the educated mind It has two important roles to play as queen of the sciences providing the logical structure that holds science together and as a handmaiden to those sciences carrying out the computations that apply scientific concepts Unfortunately a gulf exists between science and the humanities and our text About Mathematics seeks to bridge that gap to serve humanities students just as humanities texts are offered to inform science students In doing so unlike most math texts we avoid the usual focus on detailed techniques to expose instead some of the important concepts and values of mathematics

Mathematical Interest Theory Leslie Jane Federer Vaaler,James Daniel,2009-02-19 Mathematical Interest Theory gives an introduction to how investments vary over time and this book provides a solid foundation for readers embarking on actuarial careers This is done in a mathematically precise manner but the emphasis is on practical applications and giving the reader a concrete understanding as to why the various relationships should be true Modern financial topics including arbitrage options futures and swaps are introduced Along with an understanding of probability this book provides a solid foundation for readers embarking on actuarial careers It also includes detailed instruction on how to use the Texas Instruments BA II Plus and BA II Plus Professional calculators This text is among the recommended reading options for the Society of Actuaries Casualty Actuarial Society FM 2 exam
