Developments in Engineering Geology is a showcase of the diversity in the science and practice of engineering geology All branches of geology are applicable to solving engineering problems and this presents a wide frontier of scientific opportunity to engineering geology In practice diversity represents a different set of challenges with the distinctive character of the profession derived from the crossover between the disciplines of geology and engineering This book emphasizes the importance of understanding the geological science behind the engineering behaviour of a soil or rock It also highlights a continuing expansion in the practice areas of engineering geology and illustrates how this is opening new frontiers to the profession thereby introducing new knowledge and technology across a range of applications This is initiating an evolution in the way geology is modelled in engineering geohazard and environmental studies in modern and traditional areas of engineering geology *National Power Grid Study: Technical study reports* United States. Department of Energy. Office of Utility Systems,1979 **Best Practice Guide on the Control of Arsenic in Drinking Water** Prosun Bhattacharya,David Polya,Dragana Jovanovic,2017-07-15

Arsenic in drinking water derived from groundwater is arguably the biggest environmental chemical human health risk known at the present time with well over 100 000 000 people around the world being exposed Monitoring the hazard assessing exposure and health risks and implementing effective remediation are therefore key tasks for organisations and individuals with responsibilities related to the supply of safe clean drinking water

Best Practice Guide on the Control of Arsenic in Drinking Water covering aspects of hazard distribution exposure health impacts biomonitoring and remediation including social and economic issues is therefore a very timely contribution to disseminating useful knowledge in this area The volume contains 10 short reviews of key aspects of this issue supplemented by a further 14 case studies each of which focusses on a particular area or technological or other practice and written by leading experts in the field Detailed selective reference lists provide pointers to more detailed guidance on relevant practice The volume includes coverage of i arsenic hazard in groundwater and exposure routes to humans including case studies in USA SE Asia and UK ii health impacts arising from exposure to arsenic in drinking water and biomonitoring approaches iii developments in the nature of regulation of arsenic in drinking water iv sampling and monitoring of arsenic including novel methodologies v approaches to remediation particularly in the context of water safety planning and including case studies from the USA Italy Poland and Bangladesh and vi socio economic aspects of remediation including non market valuation methods and local community engagement The National Power Grid Study: Technical study reports United States.
