Networks Of Learning Automata Techniques For Online Stochastic Optimization:

Networks of Learning Automata M.A.L. Thathachar, P.S. Sastry, 2011-06-27 *Networks of Learning Automata Techniques for Online Stochastic Optimization* is a comprehensive account of learning automata models with emphasis on multi-automata systems. It considers synthesis of complex learning structures from simple building blocks and uses stochastic algorithms for refining probabilities of selecting actions. Mathematical analysis of the behavior of games and feedforward networks is provided. Algorithms considered here can be used for online optimization of systems based on noisy measurements of performance index. Also, algorithms that assure convergence to the global optimum are presented. Parallel operation of automata systems for improving speed of convergence is described. The authors also include extensive discussion of how learning automata solutions can be constructed in a variety of applications. **Springer Handbook of Automation** Shimon Y. Nof, 2023-06-16 This handbook incorporates new developments in automation. It also presents a widespread and well-structured conglomeration of new emerging application areas such as medical systems and health transportation security and maintenance service construction and retail as well as production or logistics. The handbook is not only an ideal resource for automation experts but also for people new to this expanding field. *Recent Findings in Intelligent Computing Techniques* Pankaj Kumar Sa, Sambit Bakshi, Ioannis K.
