Neural Smithing Supervised Learning In Feedforward Artificial Neural Networks:

Neural Smithing Russell Reed, Robert J Marks II, 1999-02-17 Artificial neural networks are nonlinear mapping systems whose structure is loosely based on principles observed in the nervous systems of humans and animals The basic idea is that massive systems of simple units linked together in appropriate ways can generate many complex and interesting behaviors This book focuses on the subset of feedforward artificial neural networks called multilayer perceptrons MLP These are the mostly widely used neural networks with applications as diverse as finance forecasting manufacturing process control and science speech and image recognition This book presents an extensive and practical overview of almost every aspect of MLP methodology progressing from an initial discussion of what MLPs are and how they might be used to an in depth examination of technical factors affecting performance The book can be used as a tool kit by readers interested in applying networks to specific problems yet it also presents theory and references outlining the last ten years of MLP research Neuronale Netze zur Prognose und Disposition im Handel Sven Crone, 2010-06-07 Sven F Crone bietet eine fundierte Analyse der Grundlagen zur Prognose Disposition und der Verfahrensklasse der Neuronalen Netze und zeigt an Beispielen neue Wege zu ihrer Anwendung auf **Geophysical Applications of Artificial Neural Networks and Fuzzy Logic** W. Sandham, M. Leggett, 2013-06-29 The past fifteen years has witnessed an explosive growth in the fundamental research and applications of artificial neural networks ANNs and fuzzy logic FL The main impetus behind this growth has been the ability of such methods to offer solutions not amenable to conventional techniques particularly in application domains involving pattern recognition prediction and control Although the origins of ANNs and FL may be traced back to the 1940s and 1960s respectively the most rapid progress has only been achieved in the last fifteen years This has been due to significant theoretical advances in our understanding of ANNs and FL complemented by major technological developments in high speed computing In geophysics ANNs and FL have enjoyed significant success and are now employed routinely in the following areas amongst others 1 Exploration Seismology a Seismic data processing trace editing first break picking deconvolution and multiple suppression wavelet estimation velocity analysis noise identification reduction statics analysis dataset matching prediction attenuation b AVO analysis c Chimneys d Compression I dimensionality reduction e Shear wave analysis f Interpretation event tracking lithology prediction and well log analysis prospect appraisal hydrocarbon prediction inversion reservoir characterisation quality assessment tomography 2 Earthquake Seismology and Subterranean Nuclear Explosions 3 Mineral Exploration 4 Electromagnetic I Potential Field Exploration a Electromagnetic methods b Potential field methods c Ground penetrating radar d Remote sensing e inversion *Handbook of Neuroengineering* Nitish V. Thakor, 2023-02-02 This Handbook serves as an authoritative reference book in the field of Neuroengineering Neuroengineering is a very exciting field that is rapidly getting established as core subject matter for research and education The Neuroengineering field has also produced an impressive array of industry products and clinical applications It also serves as a reference book for
