Politics in Deeply Divided Societies Adrian Guelke, 2013-04-25 The establishment of durable democratic institutions constitutes one of the major challenges of our age As countless contemporary examples have shown it requires far more than simply the holding of free elections The consolidation of a legitimate constitutional order is difficult to achieve in any society but it is especially problematic in societies with deep social cleavages This book provides an authoritative and systematic analysis of the politics of so called deeply divided societies in the post Cold War era From Bosnia to South Africa Northern Ireland to Iraq it explains why such places are so prone to political violence and demonstrates why even in times of peace the fear of violence continues to shape attitudes entrenching divisions in societies that already lack consensus on their political institutions Combining intellectual rigour and accessibility it examines the challenge of establishing order and justice in such unstable environments and critically assesses a range of political options available from partition to power sharing and various initiatives to promote integration The Politics of Deeply Divided Societies is an ideal resource for students of comparative politics and related disciplines as well as anyone with an interest in the dynamics of ethnic conflict and nationalism

Contested Holy Cities Michael Dumper, 2019-05-14 Examining contestation and conflict management within holy cities this book provides both an overview and a range of options available to those concerned with this increasingly urgent phenomenon In cities in India the Balkans and the Mediterranean we can see examples where religion plays a dominant role in urban development and thus provides a platform for conflict Powerful religious hierarchies the generation of often unregulated revenues from donations and endowments the presence of holy sites and the enactment of ritualistic activities in public spaces combine to create forms of conflicts which are arguably more intense and more intractable than other forms of conflicts in cities The book develops a working definition of the urban dimension of religious conflicts so that the kinds of conflicts exhibited can be contextualised

and studied in a more targeted manner It draws together a series of case studies focusing on specific cities the kinds of religious conflicts occurring in them and the international structures and mechanisms that have emerged to address such conflicts Combining expertise from both academics and practitioners in the policy and military world this interdisciplinary collection will be of particular relevance to scholars and students researching politics and religion regional studies geography and urban studies It should also prove useful to policymakers in the military and other international organisations
