The NERVOUS SYSTEM

Parts of the nervous system

- Nervous system: the part of the body that controls and coordinates the activities of the body and responds to the environment
- Central nervous system (CNS): the brain and spinal cord
- Peripheral nervous system (PNS): the nerves that connect the CNS to the rest of the body
- Neurons: the basic units of the nervous system that transmit information
- Glial cells: cells that support and protect neurons
- Synapses: the points of contact between neurons where information is transmitted
- Action potential: a rapid change in the electrical potential across the cell membrane
- Reflex arc: a simple neural circuit that controls a rapid response to a stimulus
- Sensory input: information that enters the nervous system from the environment
- Motor output: information that leaves the nervous system to control the body's response
- Integration: the process of combining information from different sources to make a decision
- Homeostasis: the process of maintaining the internal environment of the body
