

Introduction to Networks (Version 7.00) – Modules 14 – 15: Network Application Communications Exam

1. Which action is performed by a client when establishing communication with a server via the use of UDP at the transport layer?

- The client sets the window size for the session.
- The client sends an SYN to the server to start the 3-way handshake.
- **The client randomly selects a source port number.**
- The client sends a synchronization segment to begin the session.

2. Which transport layer feature is used to guarantee session establishment?

- UDP ACK flag
- **TCP 3-way handshake**
- UDP sequence number
- TCP port number

3. What is the complete range of TCP and UDP well-known ports?

- 0 to 255
- **0 to 1023**
- 256 – 1023
- 1024 – 49151

4. What is a socket?

- the combination of the source and destination IP address and source and destination Ethernet address
- **the combination of a source IP address and port number or a destination IP address and port number**
- the combination of the source and destination sequence and acknowledgment numbers
- the combination of the source and destination sequence numbers and port numbers

5. A PC is downloading a large file from a server. The TCP window is 1000 bytes. The server is sending the file using 100-byte segments. How many segments will the server send before it requires an acknowledgment from the PC?

- 1 segment
- **10 segments**
- 100 segments
- 1000 segments

Explanation: With a window of 1000 bytes, the destination host accepts segments until all 1000 bytes of data have been received. Then the destination host sends an acknowledgment.

6. Which factor determines TCP window size?

- the amount of data to be transmitted
- the number of services included in the TCP segment
- **the amount of data the destination can process at one time**
- the amount of data the source is capable of sending at one time

Explanation: Window is the number of bytes that the sender will send prior to expecting an acknowledgement from the destination device. The initial window is agreed upon during the session startup via the three-way handshake between source and destination. It is determined by how much data the destination device of a TCP session is able to accept and process at one time.

Network Guide To Networks Chapter 7 Answers

Internet Guide to Knowledge Management and Intellectual Capital Sabine Pekarz, 2002-03-07 Inhaltsangabe Abstract This survey has shown that although the internet is full of information it is difficult to find the information required fast Before starting an internet survey it is essential to be conscious of the intention of the search and the expected results and to translate this into one or more keywords The intention of the keyword searches knowledge management and intellectual capital was to find out how the topic is treated on different pages The categorization by content has shown that a main part of the links can be assigned in the advertisement categories This is the case for both the hits of MetaCrawler and those of Umap A further community of the results of the two search instruments is that the categories knowledge base and best practices only take a small part whereas the categories content discussion and collection of resources are relatively well attended Great importance has been attached to the category content discussion in the index and chapter 6 is fully dedicated to interesting links concerning the content This is because the discussion of the topics combined with definitions and explanations is the background and the basis for the rest of the categories As the assignment to the category content discussion does not declare anything about the quality of the discussions the index in chapter 4 has to be included in the study Strictly speaking a great part of those links is dedicated to advertisement and gives some explanations concerning the topics It has been detected that most of the pages with content discussion give only a short introduction into the topic The pages that examine the topics more closely are an exception to the rule Five links of this minority are introduced in chapter 6 Two of them are very interesting pages concerning the content They are listed at top

position because different opinions concerning knowledge management and intellectual capital are introduced the topics are treated in great detail and the explanations are good and quite easy to duplicate In order to find out if the results are capable to represent the totality the reliability of the categorization built up with Umap artificial intelligence and that built by human intelligence have been analyzed with the means of hypotheses The test of the hypotheses that are based on a comparison of the results and processes of the categorizations has shown that the categorization by Networking For Dummies Doug Lowe,1999-05-26 The first book anyone needs for setting up or operating a network Networking For Dummies features networks using Windows 98 Windows NT and Novell NetWare 5.0 Whether wanting to hook up to the Internet set up a business network or get a home PCs working together this guide will help **Network+?Study Guide (Exam N10-002)** David Groth,Todd Lammle,William Tedder,2003-07-11 If you re serious about getting your Network certification and advancing your career in the field of networking then here s the book you need This Deluxe Edition of the best selling Network Study Guide provides In depth coverage of every exam objective Practical information on essential hardware and OS related tasks Expert insight into real world implementation of networking technologies Leading edge exam preparation software including the Network Virtual Lab as well as Sybex s custom testing engine electronic flashcards and the entire book in PDF Authoritative coverage of all domains for the Network exam Media and topologies Network implementation Protocols and standards Network Support This book has been reviewed and approved as CompTIA Authorized Quality Curriculum CAQC Students have a number of important study advantages with CAQC materials including coverage of all exam objectives implementation of important instructional design principles and instructional reviews that help students judge their learning comprehension and readiness for the certification exam **Internet Solutions for HR Managers** Edward B.
