Curado,2009-06-23 It is our great pleasure to welcome you to the Second International Workshop on Future Multimedia Networking FMN Following the first successful workshop held in Cardiff Wales in 2008 this year's workshop continues the tradition of being a premier forum that gives researchers and practitioners a unique opportunity to share their experiences and discuss state of the art research results and major recent accomplishments in the area of multimedia networking In recent

years real time multimedia services have contributed extensively to our life experience and are expected to be among the most important applications in the future Internet. The management of content distribution services and the efficient delivery of real time multimedia services over diverse and heterogeneous wired and wireless systems remain a significant challenge for future multimedia networking systems. This year's workshop focused on various aspects of multimedia systems content networking and autonomous communication. A special emphasis was placed on upcoming autonomic content networks and technologies that contribute to their development. The call for papers attracted 64 submissions from 32 countries for the main workshop. The Program Committee accepted 16 papers, an acceptance rate of 25% that cover a range of topics including wireless and ad hoc networks in autonomic content networking, streaming and voice services, group and multi-party services, and quality in video and Internet services. This year we also had a Demonstration Session on Future Multimedia Networking for which 12 papers were accepted out of submissions received from over 15 countries. It is our sincere hope that the proceedings of this workshop will serve as a valuable reference for multimedia researchers and developers.
