A lively and bold blueprint for moving beyond the era of institutional failure by transforming our outmoded political and economic systems to be resilient to twenty-first century problems from the popular entrepreneur, bestselling author, and political truth teller. A vitally important book. Mark Cuban. Despite being written off by the media, Andrew Yang's shoestring 2020 presidential campaign, powered by his proposal for a universal basic income of \$1,000 a month for all Americans, jolted the political establishment, growing into a massive, diverse movement. In *Forward*, Yang reveals that UBI and the threat of job automation are only the beginning, diagnosing how a series of cascading problems within our antiquated systems keeps us stuck in the past, imperiling our democracy at every level. With America's stagnant institutions failing to keep pace with technological change, we grow more polarized as tech platforms supplant our will while feasting on our data. Yang introduces us to the various priests of the decline of America, including politicians whose incentives have become divorced from the people they supposedly serve. The machinery of American democracy is failing, Yang argues, and we need bold new ideas to rewire it for twenty-first century problems. Inspired by his experience running for office and as an entrepreneur, and by ideas drawn from leading thinkers, Yang offers a series of solutions, including data rights, ranked

choice voting and fact based governance empowered by modern technology writing that there is no cavalry it's up to us This is a powerful and urgent warning that we must step back from the brink and plot a new way forward for our democracy
