nudge so that it begins to roll What does the path it takes look like So begins the journey that Christof Weber takes you on in Mathematical Imagining A Routine for Secondary Classrooms Along the way he makes the case that the ability to imagine manipulate and explain mathematical images and situations is fundamental to all mathematics and particularly important to higher level study Most importantly drawing on years of experiments in his own classroom Weber shows that mathematical imagining is a skill that can be taught efficiently and effectively Mathematical Imagining describes an original routine that gives students space and time to imagine a mathematical situation and then revise discuss and act upon the mental images they create You can use this creative routine to glimpse into your students thinking and discover teaching opportunities while empowering them to create their own mathematics Inside you ll find the following An introduction to the routine including the rationale behind it facilitation guidance and classroom examples Modifications to implement the routine in your classroom even with varying time constraints 37 exercises broken into four categories constructions problem solving reasoning and paradoxes Discussions of the mathematics involved in each exercise including possible follow up questions Instructions on how to create your own exercises beyond the book This one of a kind resource is for secondary teachers looking to inspire student creativity and curiosity deepen their own subject matter knowledge and pedagogical content knowledge and invite all students to access the power of their own mathematical imaginations *Discrete Mathematics* Douglas E. Ensley,J. Winston Crawley,2005-10-07 These active and well known authors have come together to create a fresh innovative and timely approach to Discrete Math One innovation uses several major threads to help weave core topics into a cohesive whole Throughout the book the application of mathematical reasoning is emphasized to solve problems while the authors guide the student in thinking about reading and writing proofs in a wide variety of contexts Another important content thread as the sub title implies is the focus on mathematical puzzles games and magic tricks to engage students
