Designing for Democracy Jennifer Forestal, 2022 How should we fix digital technologies to support democracy instead of undermining it In Designing for Democracy Jennifer Forestal argues that accurately evaluating the democratic

potential of digital spaces means studying how the built environment a primary component of our modern public square structures our activity shapes our attitudes and supports the kinds of relationships and behaviors democracy requires While many scholars and practitioners are attentive to the role of design in shaping behavior they have yet to fully engage with the question of what structures are required to support democratic communities and how to build them Forestal closes this gap by providing a new theory of democratic space Drawing from a wide range of disciplines including architecture psychology and the history of political thought she argues that democratic spaces must be designed with three environmental characteristics boundaries durability and flexibility that taken together afford users the ability to engage in fundamental civic practices Through extended analyses of Facebook Twitter and Reddit Forestal shows precisely how well these digital platforms meet the criteria for democratic spaces or whether they do so at all The result is a more nuanced analysis of the democratic communities that form or fail to emerge in these spaces as well as more concrete suggestions for how to improve them In connecting the built environment digital technologies and democratic theory Designing for Democracy provides blueprints for democracy in a digital age [Beginner's Reddit Social Media Marketing Guide](#) Juha Öörni,2017-10-13

Massanari,2024-10-29 How play and gaming culture have mainstreamed far right ideology through social media platforms From Gamergate to the ongoing Big Lie the far right has gone mainstream In Gaming Democracy Adrienne Massanari tracks the flames of toxicity found in the far right and alt right movements as they increasingly take up oxygen in American and global society In this pathbreaking contribution to the fields of internet studies game studies and gender studies Massanari argues that Silicon Valley s emphasis on meritocracy and free speech absolutism has driven this rightward slide These ideologies have been coded into social media spaces that implicitly silence marginalized communities and subject them to rampant abuse by groups that have

learned to game the ecology of platforms algorithms and attention economies While populist movements are not new phenomena such as QAnon parental rights activism and COVID denialism are uniquely of the internet with supporters demonstrating both technical acumen and an ability to use memes and play as a way of both building community and fomenting dissent Massanari explores the ways that the far right uses memetic humor and geek masculinity as tools both to create a sense of community within these leaderless groups and to obfuscate their intentions Using the lens of play and game studies as well as the concept of metagaming Gaming Democracy is a novel contribution to our understanding of online platforms and far right political activism

Porter bestselling author of *The Cows and Cat Lady* Have you ever wondered why there are so few success stories of women in business leadership Or maybe you've wondered what life is really like on the other side of The Glass Ceiling The world of work is supposedly changing embracing diversity yet are the opportunities we're giving to women really equal to those of men Drawing on almost twenty years of research from around the world The Glass Cliff phenomenon whereby women are often only hired in leadership roles when a business is already underperforming meaning their chances of success are limited before they even start in the role is well established but little known Until now This is the story of The Glass Cliff a story of a structural inequality disguising itself as the personal failures of women When Sophie Williams gave her viral TED talk on the subject she was subsequently flooded with accounts of confident accomplished women who had taken what seemed like a dream leadership role only to quickly find themselves in a waking nightmare Without the language to describe their experiences they had been left blaming themselves But learning about The Glass Cliff enabled them to reframe and reexamine what they'd gone through Once we understand The Glass Cliff once we can stand together and face it head first we can start to unravel so many other false narratives about women's leadership experiences that just don't make sense without it By understanding the phenomenon and by telling one another about it we can affect the conversation empower one another to overcome societal bias and ultimately change the world of work for women forever
